# ARPAN CHAUHAN

arpanchauhan6103@gmail.com | +91 9868515320
**Linkedin | CodeChef | HackerRank | LeetCode**

## Education

**Jaypee University of Information Technology** Solan, H.P.
Computer Science Engineering B. Tech. Aug 2021 - Present
*CGPA: 7.51*

## Experience

**NTPC | Software Developer** Noida | June 2024 - July 2024
- Worked at NTPC, Noida as a software developer intern.
- Modified their website as per the given task.
- Worked on the database using MySQL, retrieving the information, deleting non-existing users.

**IIT-Mandi | AI & Robotics Intern** Mandi | Dec 2023 - Jan 2024
- Worked as an intern in the field of AI and Robotics at CAIR (Centre for Artificial Intelligence and Robotics).
- Collaborated to design, implement, and test robotic systems utilising ROS (Robot Operating System)
- Developed ROS nodes and packages for robot control and communication, demonstrating proficiency in Python and C++.

**Technical & Photography Club | Competitive Coding Head** JUIT Solan | Sep 2022 - May 2023
- Conducted an intensive bootcamp on C++ programming language, empowering students with fundamental and advanced concepts in software development.
- Facilitated opportunities for students to enhance their coding skills, sharpen their problem-solving abilities, and develop a competitive edge in the field of computer science.

## Skills

| | |
|---|---|
| Programming Languages: | C, C++, Python, R, HTML, CSS, MATLAB, Ruby |
| Libraries/Frameworks: | Pandas, NumPy, Matplotlib, JavaScript, React |
| Tools / Platforms: | Jupyter |
| Databases: | MySQL |

## Projects / Open-Source

**Plant Disease Detection using Deep Learning | Link** *CNN, NumyPy, PIL, TensorFlow, scikit-learn*
- Developed a deep learning model using Convolutional Neural Networks (CNNs) to accurately detect and classify diseases in plant leaves from images.
- The project involved extensive data preprocessing, model training, and evaluation to achieve high accuracy, demonstrating the application of advanced machine learning techniques in agriculture.
- Achieved robust model evaluation metrics, visualised training progress, and prepared the model for potential real-time deployment.

**Fake News Detection | Link** *Python, Machine Learning*
- Applied robust preprocessing techniques to ensure the quality and reliability of the dataset, including text cleaning, tokenisation, and feature extraction.
- Leveraged techniques like logistic regression, support vector machines, and neural networks to achieve optimal performance.
- Achieved high accuracy in detecting fake news, demonstrating the model's effectiveness.

**Movie Recommender System | Link** *Python, Machine Learning,*
- Implemented a sophisticated movie recommender system leveraging machine learning techniques to enhance user experience.
- Utilised Pandas for efficient data manipulation, handling and cleaning large-scale movie datasets.
- Implemented a correlation-based approach to analyse user-item interactions and identify patterns in movie preferences.

**Hospital Management System** *C++, OOPS, File Manager(fstream)*

- Implemented a robust patient information management module, allowing for the efficient storage and retrieval of patient records.
- Integrated features for updating patient medical history, treatment plans, and prescription details.
- Utilised file handling and data structures for efficient data storage and retrieval.

## Certifications

- Introduction to Internet of Things - **Cisco**
- Associate in IT Foundation Skills (Python) - **Infosys**
- Data Science Foundation Certification - **Infosys**

## Honors & Awards

- Won the Expanse 3.0 Hackathon at Jaypee University of Information Technology
- Won the Hack-a-Care Hackathon at Jaypee University of Information Technology
- Qualified for Zonal Round in Smart India Hackathon
- Achieved 3 stars in CodeChef
- Achieved 5 stars in Problem Solving, C++, Python, Sql, and Ruby in HackerRank
