PROFILE:

Data Analyst with 2 years of experience in retail banking, specializing in translating complex data into clear, impactful visualizations using **Power BI**. Proficient in database management tools such as **SQL**, **Python**, and **Excel** to streamline data cleaning, processing, and in-depth analysis. Skilled in assessing credit risk, tracking delinquencies, and conducting comprehensive portfolio performance reporting. Known for building dashboards and generating insights that enhance decision-making across credit risk management, collection, and recovery operations.

SKILLS:

- **SQL**: Proficient in writing queries, joining tables, and performing data extraction and manipulation to support analysis.
- **Python**: Experienced in data cleaning and analysis using Pandas and NumPy, with some automation through basic scripting.
- **Excel:** Advanced in data modeling, pivot tables, and Power Query for robust data analysis and reporting.
- **Power BI:** Experienced in creating dynamic dashboards and using DAX to deliver insightful visualizations for data-driven decisions.

EXPERIENCE:

LTIMINDTREE (2021/10 – 2023/11):

Assisted in analyzing and improving the loan origination process to support efficient application handling and preliminary credit assessments. Utilized SQL, Python, and Power BI to manage data and create insights for streamlined workflows and enhanced reporting.

Responsibilities:

- **Data Management**: Collected and prepared data from various sources using SQL and Python for accurate analysis and reporting on loan application trends.
- **Application Performance Monitoring**:
  - Supported the tracking of loan application metrics like approval rates, processing times, and application completion rates.
  - Built basic dashboards in Power BI to visualize key origination metrics, providing stakeholders with up-to-date process insights.
  - Assisted in creating automated reports to keep management informed of loan origination performance.
- **Risk Assessment Support**:
  - Analyzed applicant profiles and basic credit metrics to aid in preliminary risk assessments.
  - Contributed to updating risk score calculations, helping refine initial approval criteria based on historical data.
- **Reporting and Visualization**:
  - Assisted in generating regular reports and visualizations using Power BI and Excel to present findings on origination metrics.
  - Presented data insights to team leads, emphasizing key performance areas and opportunities for streamlining the application process.

EDUCATION:

- Bachelor in Computer Application from Utkal University in the year 2021
- Master in Computer Application from Utkal University in the year2023

CERTIFICATION:

- Java 8 New Features in In Simple Way
- Spring Boot Microservices with Spring Cloud Beginner to Guru
- Java New Features (Java12, java11, java10, java9 & java8)
