Experience

HCL Tech Ltd. | Senior Analyst

DEC 2021 – DEC 2024

RPA Developer (UiPath) *DEC 2021 – DEC 2024*

Web/Mobile based Application

- Created and validate requirements with user and stakeholders.
- Developed automation script ensuring 100% end result accompanied by all the best practice.
- Provided effective troubleshooting and remediation for automation scripts to ensure productivity.
- Deployed and unit tested the automation script in different Machine environments to ensure all the functionalities are working as expected.
- Linked the scripts to test manager for generating reports for client.
- Monitoring the robot in Production environment once the script is deployed.

RPA tester (UiPath Test suite)

Mobile based Application

- Created and published the test case script to test manager for testing.
- Generated reports / test results for all type of data variation as per requirement.
- Sharing the reports with client with having proper explanation on each result for client review.

UI UX Designer

Web based Application (Figma)

- Presenting design solution to client by going through user research feedback data.
- Design the UI mock-ups and prototype by ensuring user requirement and end goal.

Technical Skills

Technical Skills: UiPath, Orchestrator, RE framework, UiPath Test Suite, Document Understanding, Mobile testing, Python, Figma, Power App.

Personal/Management skills: Problem solving, Effective team work, Willingness to learn, Critical thinking.

Projects

ICICI Test Automation

- Developed Automation scripts using UiPath to reduce manual testing of existing feature of iMobile and InstaBIZ when new feature added to the application.
- Testing the developed script ensuring 100% working condition with all type of data variation as part of the user journey.
- Executed scripts through orchestrator and linked to test manager for generating reports for demo to the client and get sign off for the respective scripts.
- Monitoring the Job in production and providing summary on daily basis to the client and implementing change request if there is change in workflow.

SSL Compliance Automation

- Create a dispatcher to upload the system IP address to queue from an excel sheet.
- Create a performer to get the transaction data from queue based on which automation run and update the excel sheet as per latest compliance status.

System Data Monitoring

- Design a web UI to show different systems and system alerts to respective login user for getting a details insight on their systems and take appropriate decision as per guidelines.

Education

Indira Gandhi Institute of Technology, Sarang *Odisha, India*
Bachelor of Technology in Mechanical Engineering | CGPA: 8.2/10.00 *June 2016 - Sep 2020*

Salipur jr college, Salipur *Odisha, India*
Higher secondary education (12th) in science| Score: 83.1% *June 2014 - March 2016*

Aliabad high school, Aliabad *Odisha, India*
School / 10th | Score: 88% *June 2013 - April 2014*

Certification

- Generative AI Essential (AWS Partner) Badge
- RPA developer Advanced (UiPath Academy)
- RPA developer Foundation (UiPath Academy)
- Automation Explorer (UiPath Academy)
