SUMMARY

Skilled Software Engineer with 3 years of experience in the aerospace industry, specializing in the development of Ground Control Systems (GCS) and simulation projects. Proficient in C++ and the Qt framework, with a solid track record of delivering robust and efficient software solutions. Strong problem-solving abilities and a deep understanding of software development principles, combined with a commitment to innovation and quality. Seeking to contribute technical expertise and drive impactful projects in a dynamic environment.

2 Star Competitive coder in Codechef
5 Star Badge in Hackerrank for Problem Solving, C++, and Python.

EXPERIENCE

Software Engineer.

Tata Advanced Systems Limited
Payroll -*Saraca Solution LTD*
Sep 2022 - present(2 years)

- Responsible for the development of Qt applications for ALS 50 Simulator.
- Development and enhanced new features in GCS(Ground Control Station) software for small Unmanned Aerial Vehicles(SUAV).
- Development Database model for STANAG massage.

Software Developer Apprenticeship

The Defence Research and Development Organisation
Sep 2021 - 2022(1 year)

- Responsible for developing the Qt applications related to TAXI using DUBINS algorithm etc.
- Responsible for creating a model for Telemetry data and maintenance of other Qt applications related to Unmanned Aerial Vehicles(UAV).

Software Developer Intern

Tech Explica
(3 months) **Jan 2019- Mar 2019**

- Developed a PiChat application which is used for File sharing and chatting stuff. Submitted this project to my college for my final semester major project.

SKILLS

Proficient in C/C++ QT
Familiar with Python
Bash Scipting
Data Structure
Django
STL
Debugging

CERTIFICATION

TASL Customer Champion - Saraca Solution LTD

Machine learning in Python -Tech Explica

C++, python programming - Hacker Rank

PROFESSIONAL PROJECTS

Trainer Software - ALS 50 Simulator (2023-24)

- The SRLM Simulator is mainly for Trained pilots to Operate the ALS 50 UAV. The trainer application is designed to monitor and create test scenarios for the Trainee.
- Developed Using Qt, and C++.

GCS(2023)

- Control UAV from the Ground. Communicate with Autopilot and GDT(Ground data terminal).
- Developed Using Qt, C++, Socket

Navigation Map(2022)

- Determine the shortest path from any given point to the plane flight starting point using the Dubins algorithm and provide the path points to the UAV.
- Developed Using Qt, and C++.

Data viewer(2022)

- Remotely view data related to Unmanned Vehicles.
- Developed Using Qt, c++(YAML, JSON, UDP socket)

PERSONAL PROJECTS

Pie-Chat: Developed in Python using TCP Socket Programming(2019)

- Responsible for File Sharing between two systems and chatting by using socket programming.
- Developed Using Python.

Image Converter and YouTube Video Downloader(2021)

- This application will convert the given images to PDF and can be used to download the videos from YouTube.
- Developed using Django (Python).

AcWEb

- WebApp which is used to get AC Service Facility.
- Developed using Django (Python).

EDUCATION

University Of Mysore(ONLINE)
Bachelor of Computer Application(BCA)
Pursuing (2024)

Rajokari Institute of Technology (GOVT)
Diploma, Computer Engineering
2016-2019
80.00%

Govt Boys Senior Secondary School
Intermediate
2014- 2015
70.00
