BTech(Distinction grade- 75.57%**)** from **JNTU Kakinada** with 5 Years' experience as **Data Analyst** now I am a **Data Scientist** with extensive experience in building scalable machine learning, Deep Learning and AI models and data-driven solutions. My strength is "I am Quick learner and challenging myself with new technology".

Executive Post Graduate Certification in Data Science and AI - IIT Roorkee (2024-25)

Skills:-

- **Python**-NumPy,Pandas,Seaborn,Matplotlib,Sklearn,Tensorflow,Keras,Scipy,Statistics,NLTK
- My SQL , MS SQL Server, Pycharm , Streamlit, flask, PySpark
- Power BI , Advanced Excel, Git, AWS,AZURE

Technique:-

- Data Preprocessing , Feature Engineering, Data Visualization- (EDA)
- Machine Learning- Supervised, Unsupervised, Reinforcement ML, Algorithm
- Statistical Modelling and DSA- Inferential Analysis, Z-test, F-test , P-test, Outliers, Linear Algebra
- Deep Learning- Tensorflow, CNN, RNN, ANN, LSTM, Transformer , activation function
- MLOps and cloud Git, AWS, Azure, Leadership.
- NLP, Generative AI- Nltk, re, Word Embedding, Tf-idf, Word2Vec, BerT, HuggingFace

Work History:-

~ **Jay Rice Mill Pvt Ltd (**Aurangabad, Bihar**)- Data Analyst (** Oct 2019 to **Present)**

- **Rice production supply , quality control, logistics, and financial performance.**

~ **Nexttales Technology Pvt Ltd,** Bengaluru **-Data Analyst Internship (**Jan 2024 to July 2024)

- Analyse large datasets to extract meaningful insights , enhance skills

~ **Evvolute Automobile Pvt Ltd ,** Pune **,Design Engineer(**Oct 2017-Sept 2019**)**

Project:-

1. **Chatbot using LLM or Rule based**:-Build AI chatbot that can generate human-like responses.
   Techniques: Transformer Models , Reinforcement Learning with Human feedback, LangChain, Rasa.
2. **Customer Segmentation**- Group customers based on purchasing behaviour or demographic
   Techniques: Clustering (K-Means, DBSCAN), Dimensionality Reduction (PCA, t-SNE).
3. **Credit Card Fraud Detection** : Identify fraudulent transactions
   Techniques: Logistic Regression, Ensemble Models, SMOTE for imbalanced dataset
4. **Sentiment Analysis** :- Classify text reviews as positive, negative, or neutral.
   Techniques: Natural Language Processing (NLP), Transformers, RNNs
5. **Stock Price Prediction** : Predict future stock prices using historical data
   Techniques: EDA, LSTM, ARIMA, Prophet.
6. **Image Classification:** Classify images into predefined categories
   Techniques: Convolutional Neural Networks (CNNs), Transfer Learning
7. **Medical Diagnosis:** Predict diseases from patient data
   Techniques: Logistic Regression, Random Forest, Gradient Boosting.
8. **Churn Prediction:** Identify customers likely to leave a service
   Techniques: Classification (XGBoost, LightGBM), Feature Engineering.
9. **Language Translator:** A translation model that can translate text between two languages
   Techniques: Sequence-to-sequence modelling, Attention Mechanisms, Transformers.
