OBJECTIVE

- Detail-oriented and proactive System Administrator with one year of hands-on experience in managing and maintaining an office, fielding inquiries, troubleshooting technical issues, and ensuring system monitoring.

EXPERIENCE

MITHAN TECHNOLOGIES PVT LTD

System Administrator - September 2023 - At present

- Administrators play a critical role in businesses.
- With their responsibilities varying across industries.
- Including tasks such as managing an office, fielding inquiries.
- Overseeing office inventory.
- Scheduling meetings and supervising other administrative personnel.

PROJECT DETAILS:

I have successfully hosted Jitsi.org's open source video conferencing package on a t2.medium instance on Amazon Cloud and it's serving a financially struggling school and its students in my vicinity. Conference sessions are of comparably decent quality, performance & at scale.

TECHNICAL SKILLS

• Cloud Platforms: AWS (EC2, S3, VPC, RDS, Route53, Lambda, Cloud Formation, IAM, Cloud Watch, cloud Trail, Boto 3 etc.)

• DevOps Tools: Docker, Kubernetes, Ansible, Jenkins, Terraform

• Operating Systems: Linux, Windows Server

• Programming Languages: Python (Basic), Html

• Networking: Basic understanding of VPC, subnets, and security groups
