PROFESSIONAL SUMMARY:

Results-driven Support Engineer with over 2 years of experience specializing in deployments, collaboration & Technical solutions along with Azure Cloud technologies. Proficient in build deployment, management and troubleshooting complex technical issues. Supporting highly available systems & delivering to Customer's trough Agile methodologies. Skilled in Docker, Kubernetes, and Azure's Infrastructure as a Service (IaaS) with a proven track record of enhancing client satisfaction and optimizing system performance. Strong foundation in software development and technical support blending deep technical expertise with a focus on operational excellence and continuous improvement.

TECHNICAL SKILLS:

Language: Html, CSS, JavaScript, Bootstrap, jQuery, C#, SASS, SQL (MySQL, Microsoft SQL Server), NoSQL (Mongo DB), JSON, XML

Frameworks: ReactJS, React Native, NodeJS, ExpressJS, ASP. Net (. Net Core, MVC)

Tools: Git, GitHub, Tortoise SVN, REST API, Postman API, Jira, Confluence, Docker, Kubernetes, Jenkins CI/CD, Nginx, Azure Cloud Computing, VMware (ESXi, vSphere)

Others: Windows Server, Linux, Visual SVN Server, Agile Methodologies, SOLID, Debugging, Root Cause Analysis, Software Development Life Cycle

---

EXPERIENCES:

Support Engineer | Knight Fintech 28 Feb 24- 19 Nov 24

- Managed, Tracked & Maintained Software Builds using Proof Hub, WinSCP, Windows Server & Azure Cloud over multiple Environments ensuring successful Go-Live Scenarios. Managed and tracked deployments, collaborated with internal teams (Product, Engineering, QA) and communicate release updates
- Collaborated with Product, Engineering, and Business teams to maintain high availability of the product across the organization.

- Debugging Source Code & made Root Cause Analyses using Tortoise SVN and Microsoft SQL, solving 10 major customer-side issues & mitigating Risk.
- Fluent in Version Control System using Tortoise SVN and Visual SVN Server for Branching, Merging, Archival and Quality Code Analysis.
- Proficiency in Azure cloud services, handling Client's Server Onsite with deployments, server management, and delivering platform-as-a-service (PAAS), infrastructure-as-a-service (IAAS), and software-as-a-service (SAAS).

Technical Support-CSM | Knight Fintech 28 Feb 23 - 28 Feb 24

- Functioned as a Techno-Functional Consultant, playing a pivotal role in bridging the gap between technical solutions and business requirements within the Banks & internal Team.
- Working closely with Customer Success Managers, Business Analysts, and the Infrastructure Team to ensure smooth software integration and optimal performance reducing Risk by 10%.
- Acted as a primary point of contact for technical inquiries, effectively translating complex technical concepts into actionable insights for non-technical stakeholders, thereby facilitating informed decision-making and driving continuous improvement initiatives.
- Played a key role in optimizing operational efficiency, enhancing product functionality, and ensuring high levels of client satisfaction through proactive issue resolution and continuous support.

Skills: Cross: · Cultural Collaboration ·Stakeholder Engagement ·Compliance, Agile Methodologies · Microsoft Office · Windows Server · Software Documentation · Debugging · Troubleshooting · Stakeholder Communication· Business analysis · Technical Documentation · Win SCP · Tortoise SVN · Visual SVN server · App Server · Windows Server · IIS Express · Jenkins (CI/CD) · Backup solutions ·Data restoration ·Data integrity assurance ·DC/DR

Associate Software Engineer | Gupshup 31 Oct 22 – 20 Feb 23

- Coordinated with Facebook Support & provided SAAS to Clients in utilizing Meta's WhatsApp Business Product such as WhatsApp Business API helping Business platform helps B2B organizations in creating sales and marketing on WhatsApp according to WhatsApp Commerce policies.
- When an organization wants to scale a business, the consumer needs to route through Gupshup and we provide them with all the tools and API's.
- Coordinated API Design, Development, and Documentation for internal apps using Jira, Confluence, & maintained Knowledge base for all Internal User's.
- Responsible for making internal Documentation for many processes for all other Gupshup products like knowlarity, Ask Sid etc., using Confluence.
- Solved more than 200 tickets in span of 1 month and increase client satisfaction up to 45% with Zendesk. Maintained overall average CSAT score of 90%.

- Co-ordinated in managing Docker to Debugging the issue to the root level. Escalated to the Developer/ Engineer/L3 Engineer.

- Implemented Docker Activities including setup, maintenance and troubleshooting and enhancing system and reliability across all environments

Skills used: Networking · WhatsApp Message API · REST APIs · Windows · Zendesk · Jira ·Confluence · React.js · Microsoft Office · Linux · Documentation · Software Documentation · Docker · Troubleshooting · Stakeholder Communication ·Customer Onboarding

MERN Engineer | Rapidqube Mar 22 – Aug 22

Developed a cryptography-based blockchain system and various applications on MERN Stack. Applications includes below details:

- Bahrain Website: Developed a company website using React.js, HTML, CSS, Bootstrap, and SASS, designed to be fast, responsive, and SEO-optimized. Included essential sections like Customer Success, Contact Us, and Careers. Fully integrated with the company's internal ERP system for seamless data flow. Engineered for scalability, with ongoing maintenance to ensure peak performance and compatibility. Structured to support easy content updates, ensuring an agile response to business needs.

- Stocks App with DB: - Built a Stock Management application utilizing Node.js, Express.js, Mongoose, and MongoDB for robust database functionality. Developed RESTful APIs with Axios and Mongoose for reliable database interactions. Implemented CRUD operations to manage stock data efficiently, with optimized connectivity to enhance data consistency. Designed to support rapid response times for real-time data handling, allowing users to monitor and manage stocks dynamically.

- Reward System: -Created a Reward System app tailored for HR integration with the existing ERP system, built on React, Node.js, Express, and MongoDB. Frontend developed with React and styled using Bootstrap for a clean and intuitive UI. Axios is employed for seamless HTTPS requests, ensuring secure data transactions. Supports three main user roles—HR, Manager, and Employee—with role-specific functionalities:

    - HR: Manages users (employees and managers) and assigns rewards.
    - Manager: Monitors reward balance and distributes rewards to employees.
    - Employee: Redeems rewards and tracks reward balance in real-time.

- Kaleki-App: -Designed and developed a real-time cricket mobile application using React Native and Firebase. Delivers live cricket scores, leveraging real-time data updates to enrich the user experience. Features include individual user accounts, with options for password and security management, as well as follower and following tracking. Supports real-time contact synchronization, allowing users to import friends directly from their device's phonebook.

Skills: · Graphic Design · React.js ·Redux.js ·React Native ·HTML ·CSS ·Bootstrap ·SAAS ·UI/UX Design· MongoDB ·Mongoose DB ·ERP Integration ·Firebase ·SAML ·OAuth · Networking · REST APIs ·Axios · Windows · Git · Express.js · Node.js · Software Development Life Cycle (SDLC) · Agile Methodologies · JavaScript · GitHub · Image Editing · Software Quality Assurance · Documentation · Software Documentation · Figma ·SEO Optimization

Graduate Trainee | Cognizant Feb 22- Mar 22

Experienced professional with a strong understanding of Cognizant's policies and processes, specializing in Oracle Server administration and client support across diverse geographies. Proficient in handling tickets, queries, and client requirements through various communication channels such as voice, chat, and email. Skilled in ensuring system stability through regular backups, error resolution, and network optimization. Proven ability to analyze error logs, prevent system failures, and eliminate malfunctions.

- Managed Oracle Server tasks, including system reboots, backups, error resolution, and preventive maintenance for clients across different geographies.
- Provided timely and efficient support to clients via voice, chat, and email, addressing their queries, troubleshooting issues, and ensuring client satisfaction.
- Conducted regular network optimizations, setup configurations, and managed firewall settings to enhance system performance and security.
- Analyzed error logs, identified root causes, and implemented solutions to eliminate errors, prevent system failures, and optimize system functionality.
- Collaborated with team members to streamline processes, improve efficiency, and deliver exceptional Stakeholder Communication.
- Maintained accurate documentation, reports, and records to track system activities, monitor performance metrics, and support decision-making processes.

Skills: · Microsoft Excel · Server Administration ·System Stability & Optimization ·Stakeholder Communication · Networking · Windows · Data Analysis · Linux · English ·Multi- Channel Support ·Network Optimization · Firewall & Security Protocols ·Root cause Analyses ·System Failure Prevention

EDUCATION:

University of Mumbai	M.Sc. in Information Technology | | 7.9 CGPA	Mar2021 - May 2024
Vidyalankar School of IT	B.Sc. in Information Technology | 7.60 CGPA	Mar 2018-May 2021
HSC 12th Std	Vidyaprabhodhini Jnr College | 65.85 %	Mar 2018
SSC 10th Std	Vidyaprabhodhini Eng School | 59.20%	Mar 2016

CERTIFICATIONS:

1. Oracle's Cloud Infrastructure (Link)
2. Business Analyst Fundamentals-2022 (Link)
3. Software Testing (NPTEL from IIT-K)
4. TCS ION- Soft skills. (Link)
5. Database management systems- MySQL(Link)
6. Blockchain A-Z™: Learn How to Build Your First Blockchain (Link)
7. R Basic -R Programming Language Introduction (Link)
8. jQuery for Absolute Beginners: From Beginning to Advanced (Link)
9. The complete front-end web development course! (Link)
10. Version control with GitHub. (Link)
11. Poster & Banner design for Beginners (Link)
12. Internet & Web Development Fundamentals (Link)
13. Postman Course – REST Api Testing & development (Link)
14. Microservices with Spring Cloud (Link)
15. Mastering Software testing with Agile (Link)
16. Rest API Testing (Automation) from Scratch-Rest Assured Java (Link)
17. The Customer: How to Understand Their Needs (Link)
18. Write Better Emails: Tactics for Smarter Team Communication (Link)
19. Productivity Machine: Time Management & Productivity Hacks (Link)
20. Data management using SQL & NoSQL databases (Link)

PROJECT:

- E-commerce: E-commerce Website (final year project): - Built a Web Site from Scratch inclusive of tech Stack such as HTML, CSS & PHP for database using MySQL. It is used to buy & sell electronic waste through the app. An e-commerce shop to buy, sell items.
- Global Monitoring System Implementation: Configured CloudWatch and custom monitoring alerts on AWS to proactively manage and maintain system health, achieving over 99.99% uptime for high-traffic applications.
- Infrastructure Automation with IaC: Deployed multi-cloud resources using Terraform, allowing infrastructure to be re-provisioned instantly, contributing to enhanced scalability and operational consistency.
- 24x7 SaaS Infrastructure Support: Monitored and maintained a mission-critical SaaS platform, ensuring high availability and conducting regular root cause analyses for incidents in a hybrid cloud environment.
