## Education

**Sree Vidyanikethan Engineering college - Tirupati, Andhra Pradesh** Nov 2021 - Aug 2024
Bachelors of Technology in Electronics and Instrumentation Engineering **CGPA: 7.7/10**

**G. Pulla Reddy Polytechnic college - Kurnool, Andhra Pradesh** Apr 2018 - Sep 2021
Diploma in Applied Electronics and Instrumentation Engineering **Percentage: 71.8**

## Projects

**Registration form to sign up and store user Information using html,css,node.js in Mongodb**

- Developed a comprehensive registration form using HTML, CSS, JavaScript, Node.js, and MongoDB. Created responsive, user friendly interfaces and implemented client-side validation.
- Features :-
  User Input Fields: Includes fields like name, email, password, and contact information.
  Form Validation: Validates user inputs for completeness and correct format.
  Data Storage: Stores user data in a MongoDB database.
  Responsive UI: Uses CSS to create a responsive design.
  Server-Side Integration: Connects to MongoDB using Mongoose and handles POST requests to store data.

**Portfolio Personal Web Project**

- Personal portfolio website showcasing skills, projects, and achievements using HTML, CSS, and JavaScript..
- Designed and developed a visually appealing website deployed on GitHub Pages.
- Managed project files using version control for collaboration and tracking changes.

**A Wi-Fi Based Smart Wireless Sensor Network For Monitoring An Agriculture Climate Control Using [ Iot ] Technology**

- The project aims to develop an IoT-based climate monitoring system for agricultural fields, using a network of wireless sensors and Wi-Fi connectivity. It enables real-time tracking and control of environmental parameters like temperature, humidity, soil moisture, and light intensity, optimizing crop growth and yield.
- Hardware Components Used : Microcontroller: ESP8266/ESP32 for data transmission and control.
  Sensors: DHT11/DHT22 for temperature and humidity. Soil Moisture Sensor. LDR (Light Dependent Resistor) for light intensity. Rain Sensor for precipitation detection.
  Wi-Fi Module: ESP8266
- Software Components : Cloud Platform: Google Firebase for data storage and visualization.
  Microcontroller Programming: Arduino IDE or PlatformIO for coding ESP8266
  Web Dashboard: Developed using HTML, CSS, JavaScript, and integration with cloud APIs.

## Internships

**Bharath Intern - Full Stack Development**

- Completed a Full Stack Development internship at Bharath, gaining hands-on experience in Java, Python, and various web development technologies. Developed and optimized web applications using front-end and back-end frameworks. Demonstrated skills in coding, debugging, and integrating software components, with a focus on delivering scalable and efficient solutions.

## Certifications

- **ExcelR** Full Stack Java Developer
- **Microsoft** Career Essentials in Software Development by Microsoft And Linkedin
- **APSSDC** PCB Designing
- **HackerRank** Python
- **HackerRank** SQL

## Skills and Interests

Java, Python, HTML, CSS, JavaScript, React.js, MongoDB, SQL, Git, Video Editing, Figma

## Relevant Coursework

Data Structures, Algorithm, Database Management System, Object Oriented Programming, MySQL, UI Design

## Positions of Responsibility

**School House Caption , Kendriya Vidyalaya Sangathan**
Led a team of students to organize school events, sports activities, and competitions. Represented the house during inter-house meetings and coordinated with faculty and student leaders.

**Head of Readers Club Team at Sree Vidyanikethan Engineering college**
Organized events to promote entrepreneurship, facilitated patenting of student ideas, and guided trademark registration for ventures.
