MERN Stack & Ethereum Blockchain Developer

Objective

A passionate MERN Stack and Ethereum Blockchain Developer skilled in delivering efficient and secure web, DeFi, NFT, and SEO-optimized solutions. Experienced in building full-stack web applications and decentralized solutions using scalable and secure methods. Proficient in smart contract development, auditing, and cloud technologies, with a focus on innovative projects that combine Web2 and Web3 technologies to solve real-world challenges.

Technical Expertise

- Expertise in enhancing website loading speed and performance.(SEO Analyst)
- Skilled in building and deploying websites from scratch.
- Knowledge in MongoDB Aggregation Pipeline.
- Solidity Auditing and Protocol Analyst for Smart contracts.

SKILLS

- **Web Development**: MERN Stack (MongoDB, Express.js, React.js, Node.js).
- **Blockchain Development**: Ethereum ,Solidity auditing ,NFT ,Defi, Web3.js, IPFS, Foundry, Truffle.
- **Tools & Platforms**: Git, GitHub, Cloud Services, MetaMask, Render & Vercell (Hosting)
- **Other Skills**: Data Structures, Problem Solving, Communication Skills, Leadership skills.
- **Certifications :** Full Stack Blockchain Development (Inueron) , Eduskills ,NPTL

EXPERIENCE

MERN Stack Development

- Developed and hosted **Student Cloud portfolio** ,**Slot Booking ,Workers management** MERN stack-based applications .Developed some mini projects .
- Integrated cloud services into the application for better performance and scalability.
- Implemented **REST full APIs** and optimized database queries for faster performance.
- Expertise in MongoDB Aggregation Pipeline.

Ethereum Blockchain Development (Solidity)

- Created a **Supply Chain** ,**Blockchain Voting Application** using Solidity and Ethereum for decentralized, secure voting.
- Developed several **DeFi applications** for learning and testing purposes using smart contracts and Web3.js
- Experience with **IPFS** for decentralized storage and **Meta Mask** for Web3 wallet integration.
- Developed **DeFi applications** using **smart contracts** and **Web3.js** for testing and learning purposes.
- Industrial Experience in MERN development ,Ethereum block chain Development..

EDUCATION

- **Bachelor of Technology (B.TECH) in Computer Science and Engineering**
  Lendi Institute of Technology and Engineering – Expected 2026
  - CGPA: 8.2
