SUMMARY

Proficient in **PHP, Laravel, SQL, Java, HTML, CSS, JavaScript, Vue.js**, and **AWS**. Skilled in building and optimizing web applications, **developing APIs**, and leveraging cloud services for scalable solutions. Adept at troubleshooting, system maintenance, and performance optimization. Seeking roles in **development**, support, and **database management**

WORK EXPERIENCE

Bhavitha TechSolutions Pvt Ltd

March 2024

Baker real estate incorporated(Canada religion project)

When it comes to maintaining and improving web applications, efficient support and bug fixes are crucial. For monitoring, tools like New Relic, Sentry, or Laravel Telescope can be invaluable in tracking performance and identifying issues. Once issues are detected, they should be logged systematically using bug-tracking. For critical problems, hotfixes are essential; they allow for rapid deployment of urgent fixes to ensure minimal disruption to users.

On the back end, Laravel offers a robust framework for development. Controllers in Laravel manage incoming requests and direct them to the appropriate response mechanisms. Models are used to define and interact with the data structure, ensuring that data integrity and relationships are maintained. Routes are mapped to controllers, making sure that URLs are correctly linked to the intended functionality. Additionally, creating API endpoints facilitates smooth data interaction between different parts of the application or with external services, enabling seamless integration and data exchange.

Backend: PHP Laravel **Front End:** Vue.js, Html, CSS, javascript **Database:** MySQL, **Compatibility:** Linux and Ubuntu, **Server:** AWS EC2, **Storage:** S3 Bucket, **API:** Integrated, **Caching:** Redis Server

Kods Technologies Pvt. Ltd.

March 2023 - March 2024

- **Pragti (Art of Living) - Office Employee Management:** Designed a comprehensive web-based prototype to streamline office management, focusing on a user-friendly interface with HTML, CSS, Laravel, MySQL, and Bootstrap. Integrated a secure user registration and authentication system, and developed a dynamic product catalog for easy product management.
- **Samruddhi (Art of Living) - Asset Management System:** Contributed to an asset management system that improved asset tracking and management for organizations. Leveraged database design and system architecture to enhance asset monitoring and provide customized solutions tailored to client needs.
- **Sanidhya (Art of Living) - Payment and Ticket Generation System:** Developed a platform for efficient payment processing and ticket generation, utilizing HTML, CSS, JavaScript, PHP, Laravel, MySQL, and Bootstrap. Implemented secure payment gateways and automated ticket issuance to simplify user transactions and reduce manual effort.

EDUCATION

Masters in Computer Application

2018-2022

Anugrah Narayan College, Patna

- Percentage: 74.5 %.

Bachelor in Computer Application

2015-2018

Anugrah Narayan College, Patna

- Percentage: 66.5 %.

SKILLS

- **Technical Skills:** Project Management, Structural Analysis, Production support, Linux, PHP, Docker, Git, Laravel, MVC, core Java Spring Boot, SQL, Hibernate, API, HTML, CSS, JavaScript, Aws,
- **Languages:** English, Hindi
- **Certifications:** AWS Technical Essentials. I completed the Java Full Stack Development Course at JSpiders, Bangalore.
