Summary

With a robust background in agile methodologies, I am seeking new challenges as a PHP Laravel or CodeIgniter developer. I bring extensive experience in software development, including coding, debugging, and collaborating with cross-functional teams. My technical expertise spans across various technologies such as PHP, CodeIgniter, Laravel, Python, Django, and MySQL, with a strong focus on integrating RESTful APIs to enable seamless communication between systems. I am proficient in using Atlassian tools such as Confluence, JIRA, and GitHub to streamline project management and improve team collaboration. Eager to leverage my skills and technical proficiency to contribute to dynamic projects and drive impactful results.

Education

East west institute of technology | banglore, karnataka
B.E(information science)

Experience

freedom app | bengaluru,karnataka

Junior Software Engineer | 08/2022 - Present

- Demonstrated a strong commitment to the company's software development initiatives, enhancing deployment efficiency.
- Actively contributed to critical tasks such as coding, debugging, and collaborating with cross-functional teams to deliver high-quality software solutions.
- Coordinated deployments of new software, feature updates, and fixes, significantly reducing downtime.
- Enhanced technical proficiency and adaptability to evolving technologies through continuous learning and application.
- Utilized Atlassian tools such as Confluence, JIRA, and GitHub to streamline project management and improve team collaboration.
- Integrated third-party services like Adjust and MoEngage into websites, resulting in improved user engagement and analytics.
- Developed robust and scalable applications using the PHP CodeIgniter framework and MySQL, ensuring efficient and secure database management.
- Engaged in continuous learning to stay current with industry best practices and emerging technologies, demonstrating a proactive approach to personal and professional development.

Vistadoors (Independent Project) | bengaluru,karnataka

Freelance Developer | 01/2024 - Present

- Led the development of an e-commerce platform using the Django Python framework, managing the entire project lifecycle from concept to deployment.
- Handled backend development, including MySQL database management and RESTful API integration for seamless transactions and real-time data synchronization.
- Conducted comprehensive testing, including unit and integration testing, to ensure the platform's performance and optimal user experience.
- Deployed the platform on a cloud-based NGINX server, utilizing Git for version control to ensure smooth and scalable deployment.
- Maintained regular client communication, ensuring project requirements were met and delivered on time.
- Gained foundational knowledge of Laravel during the project, enhancing my skills in PHP framework development and expanding my technical proficiency.

Skills

PHP, laravel, codeigniter, MySQL, JavaScript, JQuery, AJAX, RESTful API, Web Development, Python, Django, GitHub, Agile Software Development, Jira, PHPUnit

Languages

English, Kannada, Tamil

Projects

CRM Development | Software Engineer | ffreedom app

08/2022 – Present

- Contributed to the development and enhancement of a Customer Relationship Management (CRM) application.
- Developed new features and improved existing functionalities for employee-facing interfaces using the PHP CodeIgniter framework and MySQL for backend development.
- Enhanced the frontend using jQuery, AJAX, and JavaScript to create dynamic user experiences.
- Managed cron jobs for automated tasks and integrated Python-based Mage for efficient backend processing.
- Developed and integrated RESTful APIs to facilitate seamless communication between systems, improving overall platform functionality.
- Conducted API demonstrations to stakeholders, showcasing integration capabilities and functionalities.
- Leveraged Git for version control and JIRA for task tracking and project management.

Website Development | Software Engineer | ffreedom app

08/2022 – Present

- Contributed to the redesign and optimization of the ffreedom website.
- Developed backend functionality using the PHP CodeIgniter framework and MySQL to enhance performance and scalability.
- Integrated RESTful APIs to ensure seamless communication between systems and improve platform connectivity.
- Implemented third-party services such as Adjust and MoEngage to boost user engagement, track analytics, and support marketing automation.
- Ensured efficient data flow and system interoperability through API integrations and backend optimizations.
- Assisted in prototyping and developing new features using Laravel, enhancing my skills in PHP frameworks and exploring best practices.

Independent/Freelance Project | Python Django Framework

2024 – Present

- Independently developed dynamic and responsive websites using the Python Django framework, hosted on a Hostinger server with NGINX for efficient performance.
- Designed and implemented CRM panels to enhance user experience and streamline business operations.
- Managed backend data storage and retrieval using MySQL, ensuring data consistency and security.
- Utilized Git for version control on GitHub, maintaining project organization and facilitating collaboration.
- Developed and integrated APIs, ensuring scalability for future platform enhancements.
- Gained experience with Laravel while exploring its features for potential integration in future projects, including handling requests and routing.

Certificate

Python Course Certification on Kaggle:

Successfully completed Python course certification on Kaggle, demonstrating proficiency in Python programming and related skills.
