OBJECTIVE

Seeking a challenging position in an organisation where my skills and expertise can contribute significantly to its growth and profitability. Aspiring to build a promising and successful career by leveraging my abilities to drive positive outcomes and create lasting value for both the organisation and my professional journey.

SKILLS

Programming Languages: Java

Defect Tracking Tools: Jira

Testing Skills: Performance testing, positive/Negative testing, CrossBrowser testing, Mobile testing.

Databases: MySQL

Performance Testing Tools: JMeter

Code Coverage Tool: Jacocoagent

Professional Expertise: App Server/Web testing, Front-End Software testing, Functional testing.

Version control: Git

Test Automation: Selenium, TestNG.

Web Technologies: HTML, CSS, JavaScript

Automation Frameworks: Page Object Model (POM), Data-Driven.

EMPLOYMENT BACKGROUND

Company Name: Teamware Solutions, Bangalore

Client: Adobe Systems, Bangalore

SOFTWARE ENGINEER-II | MAY 2021 - OCT 2023

- Developed a web application using ColdFusion (CFM) language to facilitate a comprehensive understanding of the ColdFusion product.
- Spearheaded testing efforts for the seamless integration of Visual Studio Code (VSCode) with Adobe CFML Extension, contributing to a cohesive developer environment.
- Played a pivotal role in testing ColdFusion IDE integration, overseeing the entire testing life cycle from feature inception to signoff.
- Automated app server setup and test scripts, optimising efficiency and ensuring the reliability of application server functionality.
- Implemented test automation for the ColdFusion Admin URL using Selenium in conjunction with the TestNG framework, employing Java for backend development.
- Executed rigorous testing procedures on the ColdFusion Installer across diverse platforms, validating cross-platform compatibility and enhancing product stability.
- Individually delivered a critical feature (HTMLTOPDF) in the ColdFusion application, showcasing a high level of technical expertise and problem-solving.
- Actively engaged with customers in pre-release forums, demonstrating strong interpersonal skills and gathering valuable feedback for continuous improvement.
- Utilized JMeter for the performance testing of applications, ensuring robust performance under varying conditions.
- Ensured cross-platform compatibility by conducting thorough testing on MAC, Linux, Solaris, and Windows platforms.
- Applied expertise in J2EE environments, specifically with Apache Tomcat and Wildfly, to ensure compatibility and optimal performance.
- Managed version control using Git for the maintenance of the Test Suite, promoting efficient collaboration and code management.

EDUCATION

PESITM, Shivamogga

VISVESVARAYA TECHNOLOGICAL UNIVERSITY |
2014 - 2018 Completed bachelor's in computer science and engineering.

Awards and Recognition

Extra Miler and Shining Star Award | Huawei

- Recognised as an Extra Miler in 2019 and 2020 for consistently going above and beyond expectations, contributing significantly to the company's growth.
- Acknowledged as a Shining Star for outstanding performance and dedication, demonstrating commitment to excellence in all aspects of professional responsibilities.

- Led the creation of a comprehensive manual testing suite from inception to implementation for VSCode IDE integration, demonstrating leadership and proactive problem-solving
- Initiated and implemented Quality Assurance (QE)-related processes, including bug lifecycle management, contributing to a well-defined and efficient quality assurance workflow.

Company name: Ionidea Interactive Pvt.Ltd

Client: Huawei Technologies India Pvt. Ltd, Bangalore

ASSOCIATE SOFTWARE ENGINEER | AUG 2018 - MAY 2021

- Worked extensively in both Waterfall and Agile project environments, collaborating closely with Product Owners and Scrum Masters.
- Engaged in Agile ceremonies, including Backlog grooming, Sprint Planning, Sprint Review, Scrum, and Retrospective.
- Conducted frontend automation using Selenium with the TestNG framework, leading to the identification and resolution of long-standing bugs.
- Continuously focused on improving product quality through proactive bug identification and resolution.
- Reviewed and analysed Business Requirements, creating comprehensive Test Plans, Test Cases, Test Scripts, Test Estimation, and Requirement Traceability Matrix.
- Specialised in testing Huawei handsets, collaborating with Software Manager, Test Manager, and Software Developer to collect and validate customer requirements.
- Tested specific and general requirements corresponding to different regions and operators, ensuring product alignment with diverse user scenarios.
- Executed Stability Testing for devices based on country and operator requirements, contributing to the enhancement of product reliability.
- Managed Intermediate Package upgrade COTA and HOTA upgrade testing processes.
- Facilitated Version Testing, sharing software with frontline teams along with Release Documents.
- Oversaw the archiving process upon receiving approval from frontline teams and operators.
