Motivated to contribute to an organization's growth with expertise in Manual and Automation Testing, continually learning new technologies and maintaining a strong work ethic..

Professional Summary

- Software Testing and Quality Assurance Engineer with over 2 years and 1 month of experience in both **manual and automation testing** for web-based applications.
- Proficient in using **Agile methodologies** to ensure high-quality software throughout the development lifecycle.
- Experienced in automation testing using **Selenium WebDriver, Java, JUnit, TestNG, Cucumber**, and other tools.
- Well-versed with automation frameworks such as **Page Object Model (POM), Data-Driven, Hybrid frameworks**, and **BDD**.
- Adept at generating insightful test reports using **Log4j, Extent Reports**, and handling build management with **Maven**.
- Skilled in **Test Case Design, Test Execution, Bug Tracking, and Reporting**, with proficiency in performing various testing types, including **Smoke, GUI, Functional, System Integration, Regression, Re-testing, and Browser Compatibility Testing**.
- Currently expanding skills in **API Testing, Rest Assured, and Mobile Testing with Appium** to stay ahead in modern testing practices.
- Highly adaptable to new environments, a strong team player with excellent communication, analytical, and problem-solving skills. Passionate about learning new technologies and committed to delivering quality results.

Work Experience

- Worked as an Intern at **Wipro pvt ltd.**(Feb 2022-May 2022)
- Working as Project Engineer at **Wipro pvt ltd.**(dec 2022 -Present)

Education

- Bachelor of Technology (B.Tech) in **Computer Science Engineering**, from CMR Presidency University, Bangalore, Karnataka (2018-2022).
- Intermediate in MPC, from Narayana Junior College, Kurnool, Andhra Pradesh (2016-2018).

Skill Set

- Manual testing** : Functional Testing, Test case design, Test Execution, Bug Tracking and Reporting.
- Automation Tools & Frameworks** : Selenium WebDriver, TestNG, Junit, Hybrid Framework, Data Driven Framework, Behavior Driven Development using Cucumber ,Page Object Model(POM).
- Build Management** : Maven
- Project Management tool** : Jira
- Operating systems** : Windows
- Programming Language** : core Java

Projects Handled

Project Title : HPI
Tools : Selenium WebDriver with Hybrid framework, Maven, Jira, GitHub.
Testing : Manual and Automation
Environment : IntelliJ, Eclipse Ide

Responsibilities:

- ☐ Executed manual test cases across various testing phases such as Functional Testing, Integration Testing, and Regression Testing.
- ☐ Developed test scenarios and cases from requirement analysis, ensuring thorough test coverage. Prepared and maintained regression and smoke test suites.
- ☐ Retesting defect fixes on each release build.
- ☐ Communicated effectively with QA team members and developers to resolve testing issues. Identified, raised, and tracked critical business defects using Jira.
- ☐ Developed and executed automated test cases using Selenium WebDriver with data-driven testing and XPath locators, optimizing the testing of web applications for accuracy and efficiency.
- ☐ Worked with automation frameworks like the Hybrid framework integrated with Selenium WebDriver, contributing to the enhancement and maintenance of the automation suite.
- ☐ Generated detailed test reports using Log4j and Extent Reports to provide insights on test execution and results.
