SKILLS

Prompt Engineering | Devops | GEN AI | Github CoPilot | CI/CD | GitHub Actions | Cloud | AWS | Jenkins | Kafka | RabbitMQ | NodeJS | Java | C | C++ | JavaScript | Cassandra | MongoDB | Spring boot Framework | Backend Development | Scripting | Linux | Jira | Logging | Monitoring | Grafana | Project Management | Communication | Leadership | Time Management | Adaptability | Problem Solving | Teamwork | Creativity | Integration: Hotstar, SunNxt, ShemarooMee, ErosNow, Zee5, Hungama, Amazon Prime, Recommendation Engine(Think Analytics)

WORK EXPERIENCE

Senior Software Engineer

Feb 2022 - Present

Cognizant | Kolkata, India [cognizant](https://cognizant.com)

- **Project:** Florida Power And Light
- **Role:** Lead Software Engineer - Flight Booking Application
- **Overview:**
 - Worked as a Technological Provider for FBL Flight Services, developing a highly scalable Flight booking solution.
- **Achievements:**
 - Contributed to high/low-level system designs for a robust microservices architecture.
 - Utilized Java (v8, v9), NodeJs, Spring Boot, HazelCast, RabbitMq, Kong Gateway, and other tools for solution development.
 - Orchestrated end-to-end data lifecycle from external sources to REST API exposure for Flight booking.
 - Engineered a real-time processing engine using reactive streams for event triggering, eliminating traditional schedulers.
- **Technologies:**
 - Java, NodeJs, Spring Boot, HazelCast, RabbitMq, Kong Gateway, jQuery, Jenkins, Gradle, Maven, Git, Artifactory, Shell Scripting.
- **Responsibilities:**
 - Lead the design and development of a scalable Flight booking solution.
 - Oversaw the entire data lifecycle, including ingestion, remodeling, and exposure through REST APIs.
 - Pioneered real-time processing for efficient event triggering.
 - Utilized a diverse tech stack to ensure optimal application performance.

Software Engineer

Feb 2019 - Jan 2022

To The New | Noida, India [tothenew](#)

- **Project:** Tata Sky OTT
- **Role:** Senior Software Engineer
- **Overview:**
 - Collaborated as a Technological Partner for Tata Sky, a leading Indian direct broadcast satellite television and OTT provider.
 - Designed and developed an end-to-end, highly scalable OTT solution accessible across platforms (Android Tv, Web, Android, IOS, Binge).
- **Solution Design:**
 - Contributed to high-level and low-level system designs.
- **Tools and Technology:**
 - Java (v8 and v9), NodeJs, Spring Boot, Spring Data, HazelCast, RabbitMq, Nginx, MongoDB, Cassandra, Redis, Kafka, AWS SQS, Kong Gateway.
 - Third-Party Integrations: Hotstar, SunNxt, ShemaroMee, ErosNow, Zee5, Hungama, SonyLiv, Recommendation Engine (Think Analytics).
 - jQuery, Jenkins, Gradle, Maven, Git, Artifactory, Shell Scripting, Thymeleaf.
- **Nature of work:**
 - Contributed to the design of a highly scalable and robust microservices architecture.
 - Involved in the entire lifecycle of data, including ingestion from external sources, remodeling into data sources, and exposing data for the OTT platform through REST APIs.
 - Developed a real-time processing engine utilizing reactive streams for event triggering without traditional schedulers or cron jobs.
 - Led teams in the integration of multiple third-party services.
- OTT partner Integration boosted sales by over 30%.

CERTIFICATIONS

AWS Solutions Architect - Associate (AWS SAA)
