

Skills

- SQL
- Python (Pandas, NumPy,, Matplotlib, Seaborn)
- Tableau
- Excel (VLookup, Conditional Formatting, Pivot Tables)
- Microsoft Power BI
- IBM Cognos Analytics

Projects

HEART DISEASE DIAGNOSTIC ANALYSIS – Internship Project May 2024

- Analyzed cardiovascular data to identify key heart disease indicators like cholesterol, blood pressure, and ST segment slope.
- Performed data cleaning, **EDA**, and visualizations to explore attribute relationships with heart disease.
- Used **Python** libraries (**Pandas**, **Matplotlib**, **Seaborn**) to derive insights for predictive modeling and healthcare decisions.

AMAZON SALES DATA ANALYSIS – Internship Project June 2024

- Analyzed Amazon sales data to uncover month-wise, year-wise, and yearly month-wise trends using Python.
- Conducted ETL operations and visualized key sales metrics with **Seaborn**, **Matplotlib**, and **Pyplot**.
- Identified peak sales periods, product performance, and regional trends, creating a **Tableau** dashboard for strategic insights.

BIKE SALES DATA ANALYSIS – Personal Project September 2024

- Analyzed bike sales data to identify peak sales periods and customer purchasing patterns.
- Utilized **Excel** for data cleansing, analysis, and visualization with **functions**, **pivot tables**, and **charts**.
- Provided insights on customer segments and peak periods, creating an **Excel dashboard** to support data-driven sales strategies.

DATA PROFESSIONAL SURVEY DASHBOARD – Personal Project October 2024

- Developed an interactive **Power BI** dashboard analyzing survey responses on skills, experience, and career preferences in DS.
- Integrated and transformed data to create dynamic visual filters for key demographics and job characteristics.
- Delivered insights supporting career decisions and understanding workforce trends in the data science industry.

Work Experience

DATA ANALYST INTERN – Unified Mentor Private Limited – Remote May 2024 - August 2024

- Tasked with completing four real-time data analysis projects within a three-month span.
- Used **Python** and **Tableau** to address problem statements, providing observations and visualizations.
- Delivered actionable insights on each project, ensuring timely analysis to support strategic decision-making.

Education

BACHELOR OF ENGINEERING – Hindusthan College of Engineering and Technology – Coimbatore, Tamil Nadu June 2023

Major : Computer Science Engineering

Certification

IBM DATA ANALYST SPECIALIZATION – Coursera September 2023

- Gained hands-on experience with data analysis tools and techniques, including Python, SQL, Excel, IBM Cognos and data visualization, to perform data cleaning, analysis, and reporting.
- Developed practical skills in interpreting and presenting data insights to support data-driven decisions, enhancing my proficiency in analyzing real-world datasets.
