Education

Sant Longowal Institute of Engineering and Technology (SLIET) Bachelor of Engineering (B.E) in Computer Science Engineering SGPA: 7.8/10	2022 - 2025 (expected)
Sant Longowal Institute of Engineering and Technology (SLIET) Diploma in Electronics and communication Engineering CGPA: 8.76/10	2019 - 2022

Skills

Programming Language: C++, Python, JavaScript, Solidity, Java++++
Web Development: HTML, CSS, JavaScript, React.js
Blockchain Technologies: Ethereum, Smart Contracts, Solidity
Machine Learning: Python (NumPy, Pandas, Keras)
Database: SQL
Tools & Technologies: GitHub, Visual Studio, Cisco Packet Tracer
Operating Systems: Unix/Linux, Windows
Core Subjects: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Work Experience

SUMMER INTERN SLIET Designed and deployed convolutional neural network (CNN) models for plant disease detection, achieving an 87% accuracy rate in disease classification. Utilized Python libraries (NumPy, Pandas, Keras) to optimize model performance, improving classification speed by 30%. Collaborated with cross-department teams to integrate IoT solutions for real-time monitoring, improving agricultural data collection by 25%. - Worked with a Linux-based IoT monitoring system, ensuring secure data transfer and enhancing scalability for agricultural applications.	Jun'24 - Jul'24
--	------------------------

Projects

SecureMedChain (link) Solidity, Blockchain, React Developed a decentralized application (dApp) for secure medical records using blockchain technology, ensuring 100% data integrity and privacy. Engineered Solidity smart contracts with role-based access control, improving security by 50%. Designed a React.js front-end interface, enhancing user satisfaction by 60% through improved usability and seamless navigation. Reduced downtime to zero by ensuring real-time data accessibility with blockchain integration.	Mar'24 - Jun'24
SortVista (link) JavaScript, HTML, CSS Built an interactive web-based sorting algorithm visualizer, allowing users to visualize algorithms such as Bubble Sort, Merge Sort, and Quick Sort. Implemented dynamic controls for adjusting sorting speed and selecting different algorithms, enhancing learning outcomes by 30% for students. Increased user engagement by 40% through an intuitive front-end design and real-time feedback system, leading to higher user retention.	Oct'23 - Jan;'24

Training

Summer Internship Training BSNL Gained practical experience in network troubleshooting, enhancing network stability and reducing downtime by 15%. Installed and configured networking devices, gaining hands-on experience with network administration and TCP/IP protocols.	Jun 2021 – Jul 2021
--	----------------------------

Academic and Extracurricular Achievements

Third Winner in Hackathon, SLIET TechFest	April 2023
---	-------------------

Positions of Responsibility

Mavericks Club Coordinator - Developed innovative workshop content leading to an increase in event participation rates; engaged more than 80% of attendees through interactive sessions, resulting in a surge of membership inquiries from interested students. Led strategic initiatives to boost membership engagement by 75%, ensuring higher participation in club events.	Jan'24 - Present
Mavericks Web Development Team Lead Designed the official Mavericks club website, increasing online visibility and improving user accessibility through a responsive and interactive interface.	Jan'24 - Present
