CAREER OBJECTIVE

A Data Scientist with strong skills in Python, SQL, Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP) and Statistics. Eager to apply analytical skills to solve problems and improve processes in a fast-paced environment.

SKILLS

✚ Programming Languages:	Python, SQL
✚ Libraries/Frameworks:	Pandas, NumPy, Sklearn, Matplotlib, Seaborn, PyTorch, Streamlit, TensorFlow, nltk
✚ Tools / Platforms:	MS Excel, PowerBI, Tableau, Git, Hadoop, Azure, AWS, GCP
✚ Databases:	MS SQL Server, MySQL, Hive, MongoDB
✚ Soft-skills:	Critical Thinking, Analytical Thinking, Logical Reasoning, Leadership

EXPERIENCE

Reliance Retail | Assistant Manager

Bengaluru, India | August 2022 - March 2023

- ✚ Used Excel to optimize the execution of 3+ retail projects in Bengaluru, ensuring safety and quality through real-time tracking.
- ✚ Used Advanced Excel methods to prepare BOQs for 10+ projects, improving cost management.
- ✚ Enhanced project flow by 20% through data visualization, streamlining vendor coordination and issue resolution.
- ✚ Reduced billing delays to under 1 crore by leveraging Pivot charts and PowerBI dashboards for timely issue resolution.

PROJECTS

- ✚ [Bengaluru House Price Prediction](#) *Scikit-learn, Git, Heroku*
 - Treated missing values, detected and removed outliers using domain specific method.
 - Used Binary encoding technique to transform categorical column.
 - Built Sci-kit learn pipeline comprising standard scalar and Random Forest, Decision Tree & XGBoost.
 - Implemented Random Forest to obtain a MAPE of 18% and saved the model for deployment.
 - Used Flask and html to build a web application and deployed it on Heroku.
- ✚ [Ecommerce Sales Dashboard](#) *PowerBI*
 - Created PowerBI dashboard to analyze sales across Indian states for local e-commerce company.
 - Imported and merged multiple CSV files using an outer join on the order_id column.
 - Visualized data with bar charts and pie charts using various metrics against different demographics.
- ✚ [WhatsApp Database](#) *MS SQL Server*
 - Designed and built replica Relational Database for WhatsApp.
 - Ensured data integrity and minimized redundancy by normalizing tables up to 3NF, creating primary and foreign keys.
 - Developed and executed analytical queries to validate and demonstrate the effectiveness of the normalization process.
 - Created detailed ER diagrams to represent the normalized database structure and analytical queries used for validation.
- ✚ [Sentiment Analysis using RNN & LSTM](#) *Tensorflow, Keras, Matplotlib*
 - Pre-processed and cleaned the dataset, removing noise and irrelevant text features.
 - Conducted exploratory data analysis with word clouds, n-gram analysis, and distribution plots for sentiment scores.
 - Implemented RNN and LSTM models with Word2Vec embeddings and visualized their performance.
- ✚ [Product Review Helpfulness Predictor](#) *Datapro, Bigquery, Vertex AI, GCP*
 - Built daily scraper for Amazon reviews using PySpark on Google Cloud Dataproc, exporting data to Google Pub/Sub.
 - Implemented scheduled queries in BigQuery to perform effective data cleaning and preprocessing.
 - Built a modular application in Vertex AI Workbench, deploying it on Google Cloud Run using GitHub Actions.
 - Integrated model lineage tracking to effectively monitor and address issues related to data drift.

AWARDS & ACHIEVEMENTS

- ✚ Secured 94.7th Percentile in CAT 2023.
- ✚ Secured best Capstone project for Batch of October 2024 at Praxis Tech School.
- ✚ Contributed to securing 1st Place in Formula Hybrid 2021 as part of a student team.

EDUCATION

PGP in DATA SCIENCE & AI | Praxis Tech School | CQPI: 6.40/8
B.E. | RV College of Engineering | CGPA: 7.56/10

Bengaluru, India | January 2024 - Present
Bengaluru, India | July 2018 - August 2022
