PERSONAL DETAILS

Address: Bengaluru, Karnataka

Languages Known: English, Hindi, Kannada

EDUCATION

- Bachelor of Engineering from GM Institute Technology, Davanger, Karnataka

CORE COMPETENCIES

- Cybersecurity Operations
- Incident Response Management
- SIEM Alert & Log Analysis
- Email Analysis
- Information Security
- Cloud Security
- Malware Analysis
- Pocket Analysis
- Threat Detection Strategies
- Security Information & Event Management
- Endpoint Security Solutions
- Phishing Threat Identification
- Security Tool Management
- Vulnerability Assessment
- Ticketing System Operations

ASHOK J

Security Analyst

PROFILE SUMMARY

- Possess **4 years** of experience as a Security Analyst, concentrating on alert analysis and incident response in the field of cybersecurity.
- Directed the responsibilities of a Security Analyst by managing SIEM operations, which include the development and monitoring of correlation rules and enhancing existing protocols for peak performance.
- Conducted real-time surveillance and analysis of security incidents across multiple devices, thereby guaranteeing the smooth operation of the SOC.
- Administer Endpoint security solutions through the effective use of CrowdStrike Falcon, generating and managing incident resolution tickets via ServiceNow.
- Possess strong capabilities in threat intelligence & malware analysis, alongside a dedicated focus pocket analysis.
- Showcased a robust skill set in cybersecurity, including advanced proficiency in SIEM tools, and threat detection, complemented by a strong analytical mindset that drives effective decision-making in high-pressure environments.
- Achieved reduction in incident response timing, showcasing commitment to enhancing operational efficiency and effectiveness in security measures.
- Actively engaged in cross-functional collaboration with IT and compliance teams to ensure alignment of security protocols with organizational policies.

WORK EXPERIENCE

Security Analyst

Microland Pvt. Ltd., Bengaluru (Aug'22 - Present)

Role and Responsibility :

- Managing SIEM for the creation & monitoring of correlation rules and alerts.
- Fine-tuning existing correlation rules by developing saturation lists & exceptions to eliminate duplicate and false-positive alerts.
- Utilizing Endpoint Detection and Response (EDR) tools to identify and respond to security threats and incidents.
- Monitoring Manage Engine for various auto-generated requests and user-reported tickets, ensuring timely resolution.
- Tracking firewall traffic through SIEM dashboards and blocking external IPs/URLs based on poor reputation scores from threat intelligence sites.
- Managing Proofpoint TAP & TRAP tools to identify phishing emails with malicious URLs, domains, or attachments.
- Conducting full triage analysis using EDR tools to identify the root cause of security incidents.
- Monitoring real-time events from various security devices including firewalls, WAFs, routers, servers, IPS, email security gateways, databases, antivirus solutions, and endpoints.
- Analyzing real-time security incidents, verifying whether they are true positives or false positives, and taking appropriate action.
- Creating and assigning service tickets via ServiceNow, ensuring follow-up until resolution and closure.
- Managing endpoint security with CrowdStrike Falcon, ensuring comprehensive protection across all endpoints.

TECHNICAL SKILLS

- **OS:** Windows, Linux
- **SIEM:** Arcsight, Splunk ES, QRadar
- **EDR:** TrellixFireEye, CrowdStrike, SEP
- **Email Security:** Proofpoint, Coforge
- **DLP:** Symantec DLP
- **Firewall:** Palo Alto, FortiClient
- **VA:** Nmap, Tenable Nessus, Qualys VM
- **Ticketing Tools:** ServiceNow, Jira
- Wireshark
- O365 Defender
- Virus Total, Mxtoolbox

CERTIFICATIONS

- Palo Alto Fundamentals of SOC
- FORTINET NSE 1
- FORTINET NSE 2
- Programming for Everybody

- Configured policies to whitelist/blacklist applications, files, folders, hash values.
- Worked with Proofpoint to analyze spam and phishing emails, utilizing TAP and TRAP dashboards.
- Monitored malware trends in threat intelligence news, correlating them with company's infrastructure, & blocked relevant hashes/IOCs to prevent attacks.
- Monitored malicious emails detected by O365 Defender, and guided recipients or senders to delete or quarantine the emails.
- Led vulnerability scanning, configuration auditing, & compliance management.
- Developed understanding of cybersecurity vulnerabilities and attack vectors.

SOC Analyst

Equilibrium Corp Tech Pvt Ltd, Bengaluru (Dec'20 - Jul'22)

Role and Responsibility :

- Monitored system logs and conducted investigations into suspicious activities to identify potential security threats and vulnerabilities.
- Conducted real-time monitoring of security alerts generated by SIEM systems, ensuring prompt detection of security incidents.
- Detected, tracked, and analyzed security incidents, preparing daily, weekly, and monthly reports to communicate findings and trends to senior management.
- Managed 24x7 SOC (Security Operations Center) operations, spearheading the detection, tracking, and analysis of security incidents to ensure continuous protection and rapid incident response.
- Analyzed log data to support investigation cases, identifying key indicators of compromise and potential breaches.
- Investigated phishing emails, suspicious domains, compromised IP addresses using open-source tools, providing recommendations for proper blocking.
