~ Security Analyst~

Seeking a challenging role as a SOC Analyst or Cybersecurity Professional, focusing on network security, IT security, and cloud infrastructure. Eager to leverage my hands-on experience in cybersecurity, vulnerability assessments, and cloud technologies with a forward-thinking organization.

PROFICIENCIES EXPLAINED

- Skilled in coordinating cybersecurity projects and ensuring timely completion within budget while optimizing resource utilization.
- Experienced in analyzing, logging, and tracking complex network and system security issues, addressing server and application-related incidents to meet business needs.
- Proficient in system installation, configuration, security implementation, and troubleshooting, with a focus on network security and server maintenance.
- Adept at coordinating system upgrades and security patches, ensuring compliance with organizational policies and cybersecurity best practices.
- Highly motivated and able to solve problems under pressure, making quick, responsible decisions to meet deadlines in high-stakes environments.
- Strong problem-solving, hardware troubleshooting, and communication skills, enabling efficient resolution of technical issues and team collaboration.

TECHNICAL SKILL SET

- **Router & Switches:** CISCO Routers 2600/2800/7200 Cisco Switches 2900/3500/4500 Series, Dlink, H3C, etc.
- **Servers:** Server2012, 2012r2, Server 2008r2 Active Directory, DHCP, DNS, WDS, NLB, Cluster, Hyper-V, NFS, FTP, RRAS
- **Backup Solutions:** Windows NT backup, Windows backup&Restore
- **Incident Response Tools:** Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) tools.
- **Network Monitoring Tools:** Wireshark, Nmap.
- **Operationg System:** Windows, Linux, Mac.
- **SIEM Tools:** Splunk,Wazuh

CERTIFICATIONS & TRAININGS

- SOC Analyst Certification – US Council in year 2024
- CompTIA Security+ in year 2024
- AWS Certified Solutions Architect in year 2024
- Azure AZ-104 in year 2024
- Ethical Hacking Essentials – EC Council
- Introduction to SQL Injection Attacks – EC Council
- Introduction to Dark Web, Anonymity, and Cryptocurrency – EC Council

- Cisco Badge: Introduction to Cybersecurity
- IT Security: Defense Against the Digital Dark Arts – Coursera
- SOC Analyst Training from Zoom Technology Hyderabad
- AWS solution architect Training from Sunnet Systems Hyderabad
- Azure Administrator Training from Sunnet Systems Hyderabad

ACADEMIC CREDENTIALS

Bachelor of Engineering in Computer Science Engineering
Lords Institute of Engineering and Technology | 2021 – 2024

CAREER GRAPH

Devskills Hub India

Intern

Job Accountabilities:

- Conducted security assessments, vulnerability scans, and penetration testing exercises.
- Gained hands-on experience with ethical, IP addressing, and various software installations, including Kali Linux.
- Practiced comprehensive information gathering, utilizing tools and strategies to collect target information for penetration testing.
- Performed SQL injection, identifying vulnerabilities in web applications and databases.
- Engaged in a wide range of enumeration techniques such as HTTP, SNMP, SQL, FTP, and Telnet enumeration to extract system and service details.
- Learned Nmap scanning techniques and conducted active information gathering for advanced network scanning and reconnaissance.
- Conducted sniffing attacks and employed brute force techniques for password cracking, along with the installation and usage of Burp Suite for web security testing.
- Contributed to a minor project that applied cybersecurity methodologies to solve real-world security challenges.
- Developed skills in wireless security, web application security fundamentals, operating system security, and cryptography.
- Analyzed malware and conducted reverse engineering to understand malicious code and devise appropriate defenses.
- Investigated social engineering attacks, including carding, fake email generation, and IDN homograph attacks to understand online fraud techniques.
- Acquired knowledge of cloud computing and cyber kill chain concepts, focusing on threat detection and prevention strategies.
- Executed exercises related to live location hacking, phishing attacks, and gathering information from social media using mobile numbers.
- Strengthened understanding of legal and ethical considerations in cybersecurity, emphasizing best practices and compliance with industry standards.

- Conducted footprinting and reconnaissance, gathering intelligence on target networks for vulnerability assessment and penetration testing.
- Participated in vulnerability assessments and learned about legal frameworks and secure development practices through SDLC.
- Engaged in a Red vs. Blue Team exercise, simulating offensive and defensive cybersecurity operations to understand the dynamics of both attack and defense strategies.

Zoom Technologies

India

SOC Analyst Trainee

Job Accountabilities:

- **Security Monitoring & Incident Response:** Monitored and analyzed security incidents in real-time using advanced Security Information and Event Management (SIEM) tools such as Splunk and ArcSight, ensuring rapid detection and response to potential threats. Triage, investigated, and escalated security alerts based on severity and business impact, reducing downtime and mitigating risks.
- **Network and System Administration:** Acquired a deep understanding of IP Addressing, packet analysis, and network protocols to ensure secure and reliable network operations. Configured and administered Windows and Linux servers, including Active Directory, DHCP, DNS, and IIS services. Gained hands-on experience with setting up both client and server operating systems (Windows, Linux), performing installations and configurations.
- **Firewall and Endpoint Protection:** Managed and configured Next-Gen Firewalls, IDS/IPS systems, and Unified Threat Management (UTM) appliances to secure networks from external threats. Implemented Endpoint Detection and Response (EDR) solutions to ensure device-level security and threat hunting across networked systems.
- **SOC Operations and Best Practices:** Contributed to the operations of the Security Operations Center (SOC) by working closely with senior analysts to respond to incidents and improve the security posture of the organization. Gained exposure to SOC tools, technologies, and processes, including alert management, incident reporting, and working within an ITIL-based framework for incident and problem management.
- **Cloud Security:** Developed expertise in cloud security management by working on AWS platform, including provisioning cloud machines, setting up security groups, and configuring access control. Implemented cloud monitoring solutions to ensure robust cloud-based infrastructure security.
- **Vulnerability Management & Penetration Testing:** Conducted vulnerability assessments and penetration tests on both web applications and network infrastructures. Identified security vulnerabilities through tools like Nessus and Metasploit, and recommended remediation strategies. Addressed security threats including SQL Injection, XSS, brute force attacks, DDoS attacks, and phishing campaigns.
- **Advanced Troubleshooting & Networking:** Gained practical experience in network troubleshooting, resolving connectivity issues in LAN/WAN environments. Configured Cisco routers, implemented NAT/PAT, and set up WAN connectivity between organizational locations. Developed strong analytical skills in diagnosing and resolving issues related to network traffic, MAC tables, and firewall policies.
- **Cyber Threat Intelligence & Incident Handling:** Conducted in-depth analysis of cyber threats such as ransomware, malware, man-in-the-middle attacks, and denial-of-service (DoS) attacks. Leveraged threat intelligence to proactively detect and mitigate potential threats before they impacted operations.
- **Protocol Analysis and Security:** Mastered key networking protocols such as DHCP, DNS, FTP, SMTP, HTTP, and SSH. Monitored traffic patterns for signs of unauthorized access or malicious activity, ensuring proper configuration and security of these protocols.

- SIEM & Reporting: Managed SIEM tools to generate security reports and dashboards, highlighting key performance indicators (KPIs) of security incidents and threats. Provided actionable insights and communicated findings to senior management through comprehensive reporting on SOC activities.

Sun net Systems

India

AWS Trainee

Job Accountabilities:

- Completed comprehensive training on Amazon Web Services (AWS) , focusing on cloud infrastructure, networking, and security services.
- Gained hands-on experience in deploying and managing EC2 instances , Elastic Block Store (EBS) , and S3 storage for scalable cloud environments.
- Configured Virtual Private Clouds (VPC) , managed security groups , and implemented auto-scaling and load balancing for high-availability applications.
- Developed proficiency in IAM (Identity and Access Management) to control access and permissions for AWS resources.
- Worked with CloudWatch for monitoring AWS services, and utilized CloudFormation for infrastructure automation.
- Managed both RDS (Relational Database Service) for relational databases and DynamoDB for NoSQL databases.
- Implemented AWS services for backup, disaster recovery, and cost-optimization strategies.

PROJECTS & PUBLICATIONS	
Project#1:	Detection of Cyberbullying using Machine Learning Algorithms
Duration:	5 months
Team size:	3
Platform used:	Windows, Python, Natural Language Processing (NLP) Libraries, Social Media Data, Pandas
Description:	Designed a machine learning model to detect cyberbullying on social media platforms.
Role:	Team Lead
Paper Title:	Cybersecurity in Cloud Environments: Threats, Challenges, and Mitigation Strategies
Publisher:	International Research Journal of Moderanization in Engineering and Sciences
Paper ID:	IRJMETS61000023473
Description:	Researched cloud security risks and mitigation techniques, emphasizing AI-driven threat detection, misconfigurations, and a multi-layered approach to strengthen cloud security posture.
