📍 Bengaluru

Profile Summary

Experienced Senior Security Analyst with expertise in IT/OT cybersecurity, specializing in real-time threat detection, incident response, and vulnerability management. Proficient in SIEM, XDR, malware analysis, and VAPT, with hands-on experience supporting global critical infrastructure. Proven ability to deliver security solutions that strengthen defenses and minimize risks. Seeking to leverage advanced threat intelligence and security operations skills to drive proactive cybersecurity strategies in my next role.

Work Experience

Subex Limited

Bengaluru

Senior Security Analyst

August 2023 to Present

- Provides 24/7 monitoring of IT/OT security tools for real-time detection and response to security incidents.
- Responded to triggered alerts by analyzing event history, assessing the situation, and developing appropriate action plans.
- Conducted thorough investigations of IT/OT/IoT security alerts, specializing in malware analysis and performing detailed network/**system forensics** in industrial environments, while meticulously documenting.
- Provided onsite OT security support for critical infrastructure clients across multiple geographies, including UAE, Mexico, and India, delivering security expertise over 3-month engagements at each location.
- Proactively identify, analyze, and mitigate **phishing**, **spear-phishing**, and **malware-laden** emails to safeguard organizational assets and strengthen overall security posture.
- Expert in conducting **risk and gap analysis**, identifying vulnerabilities, and recommending mitigations to enhance IT and OT security posture.
- Conduct **malware analysis** using **static, dynamic, and sandboxing techniques** to detect, evaluate, and neutralize threats, driving faster incident response. Developed and implemented a malware analysis lab to strengthen IT/OT threat detection and monitoring for internal operations and client services.
- Proficient in executing **Digital Forensics**, leveraging advanced tools and methodologies to investigate security incidents, extract digital evidence, and drive incident response and **post-breach analysis**.
- Skilled in utilizing tools such as **SIEM, XDR, IDPS, endpoint protection, vulnerability scanners**, and **intrusion detection systems**, while actively conducting **packet analysis** with tools like Wireshark.
- Conducted thorough **threat and vulnerability assessments**, delivering targeted security recommendations that strengthened clients' cybersecurity posture and mitigated potential risks.
- Conducted high-level briefings and presentations, provided detailed status updates, delivered technical recommendations, and proactively addressed client concerns regarding security processes and procedures.
- Achieved comprehensive real-time visibility into the OT environment by actively conducting **asset discovery**, assessing protection status, auditing privileges, monitoring network traffic, and managing vulnerabilities through **Risk and Gap Assessments (RAGA)**.
- Proficient in executing VAPT to uncover security weaknesses in IT/OT environments, and devising remediation strategies to enhance system resilience.

Aujas Cybersecurity Limited

Bengaluru

Security Analyst

August 2022 to August 2023

- Experienced in working on **SIEM, EDR, and NDR Tools** such as **IBM Qradar, CrowdStrike, and Darktrace**.
- Utilize Security tools to investigate and correlate events. Monitor network traffic and security alerts for potential **events/incidents**.
- Monitor Identity and access management, including monitoring for abuse of permission by authorized system users.
- Monitoring and responding to 'Phishing' emails and 'Pharming' activity, monitoring for attacks, intrusive and unusual,

illegal, or unauthorized activity.

- **Threat Hunting and Intelligence**, analyzing threat and vulnerability, Investigating the organization's network and endpoints for suspicious/malicious activity.
- Regularly researching & processing the **IOCs** observed for different malware & APT groups.
- Creating dashboards, active lists, and active channels based on customer requirements.
- **Raising tickets** using **JIRA** for the Incidents was found to respective teams for remediation and tracking and reporting on the closure of tickets as per SLA based on the analysis.

Terralogic Software PVT LTD

Bengaluru

Security Analyst Trainee

March 2022 to July 2022

- Provided first-level compliance monitoring and investigations using **LogRhythm** and **StellarCyber** security events or incidents within a real-time IT environment.
- Performed digital forensics analysis and responded to the incidents.
- Performed basic **VAPT** for specific applications, services, networks, and servers as required.
- Performed **forensics analysis** and facts gathering including advanced malware analysis.
- Reviewed and updated documentation for policies, procedures, standards, and guidelines.

Directorate of Forensics Science – Government Cyber Forensics Organization.

Gujarat

Computer Forensics Intern

December 2021 to January 2022

- Interned for 2 months at the DFS (State Government Forensics Lab), where I gained hands-on experience in **digital evidence analysis** and assisted with **forensic investigations** under the guidance of a scientific cyber officer.
- Analyzed Damage SIM Card and Cell Phones using specialized systems, conducted Damage Hard Disk Analysis, and utilized the Universal Memory Exchanger. Enhanced images and audio through advanced techniques, operated MIDAS, Falcon, Internet Evidence Finder, and UFED devices, and executed analyses with Nero devices.

Education

- Rashtriya Raksha University - MSC in Digital Forensics and CyberSecurity (2020-2022)
- Parul University - BSC in Forensics with computer Forensics (2017-2020)

Skills

- SIEM Tools - IBM Qradar, LogRhythm
- EDR Tools - Falcon CrowdStrike, Kaspersky, Sentinel One, Sophos
- XDR Tools - StellarCyber
- NDR Tools - DarkTrace
- Email Security - O365 Defender
- ITSM - JIRA, Service Desk
- Auditing tool - ADAudit Plus
- IAM - Azure AD
- Advance Malware Analysis and basic Vulnerability Assessment
- Strong knowledge in Cyber threat intelligence, Threat Hunting, Log Analysis, Risk & Gap Analysis, and Email Analysis.

Professional Certifications

- Ethical hacking essential from EC Council
- EC-Council ICS/SCADA CyberSecurity Certified Associate
- Cybersecurity under Microsoft and DSCI Project - CyberShikshaa
- Microsoft Azure Fundamentals - AZ900
- Stellar Cyber Certified Associate
- Fortinet Network Security Expert Level 1, 2,3: Certified Associate
- Foundations of Operationalizing MITRE ATT&CK - AttackIQ
- Ransomware uncovered specialist certificate From ICTTF - Cyber Risk Academy
- Intro to DFIR: The Divide and Conquer Process - Basis Technology
