SUMMARY

I am a self-taught Python Full-Stack Developer passionate about solving problems through technology. My experience includes building scalable web applications with Python Django and React, along with strong skills in RESTful API integration and database design. I am adaptable and eager to learn new technologies. I pride myself on my problem-solving abilities and my commitment to delivering quality solutions.

EXPERIENCE

Full Stack Developer

Apta Innovations

04/2024 - 10/2024

A tech innovation company specializing in building responsive web applications.

- Built a slot-managing system with live updates and automated time calculation, reducing appointment scheduling errors by 20% and improving system efficiency by 30%.
- Implemented live updates using Django Channels, optimizing data transfer to reduce latency by 25% and improve user experience.
- Defined efficient database queries and custom algorithms for slot availability prediction, increasing system scalability to handle up to 1,000 concurrent users without performance degradation.
- Engineered 2 backend projects using Django and DRF (Django REST Framework), highlighting strong server-side development capabilities.
- Created 5 frontend web applications: 3 using React and 2 using HTML, CSS, and JavaScript, demonstrating versatility in frontend technologies.
- Led a team of 5 developers in managing project lifecycles, deploying 3 successful applications that improved user engagement by 40% and reduced deployment time by 15%.

PROJECTS

VYZO

04/2024 - 10/2024

Projects at Apta Innovations

- Comprehensive slot-managing platform designed to streamline doctor-patient interactions, offering an efficient and time-saving system for appointment management.
- Robust backend developed with Django/DRF, featuring real-time updates through Channels integration for instant communication and slot availability updates.
- Three distinct frontend applications: an admin dashboard (Django), a customer-facing app (React/Django) with QR code functionality, and a doctor's interface (HTML, CSS, Bootstrap, JavaScript) for testing purposes.
- Seamless integration of various technologies (Django, DRF, Django Channels, React, Bootstrap) resulting in a cohesive, efficient system catering to different user roles and needs.

ICS Academy

03/2024 - 04/2024

A freelance project.

Multiple E-commerce Websites

07/2022 - 08/2022

Internship Projects at Techolas Technologies

- Projects integrated a dynamic web and mobile interface using Django, React, and Django Rest Framework (DRF), with distinct admin sessions for real-time management.
- The admin dashboard allows efficient control over content, orders, and users. Multiple sessions support personalized experiences for admins, customers, and users, ensuring responsive performance on both web and mobile platforms.

SKILLS

Agile	Agile Methodology	Algorithms
apis	AWS	AWS Cloud
AWS RDS	AWS S3	bootstrap
Celery	CI/CD	CSS
Database Design	Django	Docker
EC2	Eslint	Git
Github	HTML	
Javascript	microservices	
microservices architecture	MongoDB	
MySQL	Netlify	NoSql
postgresql		
Postman	Python	RDS
rest		
restful	restful apis	s3
sns		
SQL	Swagger	unit testing

EDUCATION

Python Full stack developer Internship

Techolas Technologies

04/2023 - 03/2024 Calicut

Bachelor of Technology

Anna University

06/2022 - 03/2023 Chennai

Bachelor of Arts

University of IGNOU

07/2017 - 04/2020

Higher Secondary

GHSS South Trikaripur

07/2015 - 04/2017
