EDUCATION

Jaypee University of Engineering and Technology Guna, M.P, India

- *B.Tech Computer Science* *August 2019 - June 2023*
- *Cumulative CGPA : 7.3/10*
- *Relevant Coursework* : Software Engineering, OOPs, Operating System, Data Structures and Algorithms.

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java, HTML, CSS, JavaScript.

Libraries and Tools: PyGame, React.js, Django, OpenCV, Git, VsCode, GitHub, Bootstrap, Flask.

DataBase: SQL, MYSQL, NOSQL.

WORK EXPERIENCE

· Graduate Trainee

· *HCL-Tech, Noida* *February 2024 - May 2024*

- Collaborated with the ADIDAS team to resolve 500+ incidents ,significantly enhancing user experience.
- Examined support metrics to detect recurring issues, crafted and launched training sessions, and enhanced service efficiency by 20%, resulting in faster resolutions

· Web Developer Intern

· *DevxSoft Pvt. Ltd , Lucknow* *June 2022 - August 2022*

- Architected Front-End of a Browser based massive multiplayer online Role playing Game with the use of HTML 5 CSS , JavaScript and OOPs principles.
- Engineered a Map System that significantly improves the user experience by 30%.

· Programming Team Captain

· *Mozilla Phoenix Club , JUET, Guna*

- Kickstarted a coding challenge series in the Mozilla Programming Club, involving over 40 junior students and encouraging spirited competition.
- Orchestrated and led 10+ hackathons, driving innovation and collaboration among participants.

PROJECTS

· Human Pose Estimation System

January 2023 - April 2023

- Developed a robust Human Pose Estimation System using TensorFlow and Google Open Pose AI
- Leveraged TensorFlow and Google OpenPose AI to map 18 body points for accurate human pose depiction.

· Flappy Bird Automated Game

August 2022 - October 2022

- Created an AI-driven, unbeatable Flappy Bird game.
- Utilized Python, PyGame, and the NEAT algorithm, attaining a maximum score of 999.

· Maze Solver

- Designed and implemented a maze solver using Breadth-First Search to identify the shortest unblocked path.
- Crafted the game's front-end using HTML5, CSS, and JavaScript.

ACHIEVEMENTS

- Solved **more than 300 DSA** questions across various platforms.
- Software Engineering Virtual experience at **JPMorgan Chase and Co.**
- Engineering : Undergraduate and Masters Asia Virtual Experience Program at **Microsoft.**
