INDIAN INSTITUTE OF TECHNOLOGY, KHARAGPUR

+91-9663852301

abhishekgarg6193@gmail.com

EDUCATIONAL QUALIFICATION

Year	Degree	Institution	%/CGPA
2011-2015	B. Tech. (Hons.) in Electrical Engineering	IIT Kharagpur	7.18/10
2010	XII-CBSE (Science)	Delhi Public School, V'nagar	91.2%
2008	X-CBSE	Delhi Public School, Nigahi	93.4%

ACADEMIC ACHIEVEMENTS

- Secured AIR 711 in IIT JEE 2011 with a percentile of 99.842%

Technical Skills

Languages/Framework	Methodologies/Tools
Java, C, Spring, SpringBoot	Spring Batch, AWS, Hazelcast, Cassandra, SQL, Splunk/Kibana, Maven/Gradle, Swagger, SonarQube, Postgres, Kafka

WORK EXPERIENCES/INTERSHIPS

Whizdm Innovations Pvt Ltd		Engineering Manager	Jul 2023 – Present
- Driving a team of 10 engineers focusing 3 business verticals of LMS, BNPL and Superhome - Led the end-to-end process of brainstorming, designing, and building a Buy Now, Pay Later (BNPL) product, establishing a new business line and tapping into the retail customer segment, thereby expanding the organization’s market presence and revenue opportunities - Proactively identified and addressed developer productivity issues by introducing new deployment strategies and automations, resulting in saving approximately 5 hours of developer time per week			
Navi Technologies Pvt Ltd		SDE - 3	Oct 2021 – Jul 2023
- Led post purchase experience journey for Lending and Insurance products aimed at enhancing customer experience - Driven the digital transformation journey for Home loans origination flow reducing start to sanction funnel from 7 days to 5 minutes - Built and implemented a claims origination system for the health insurance journey, integrating with TPAs and an inbound notification engine to deliver a seamless and hassle-free claims processing experience.			
Whizdm Innovations Pvt Ltd			Jan 2019 – Oct 2021
Job Title		Software Engineer	Jan 2019 - March 2020
		Tech Lead	April 2020 - Oct 2021
- Spearheaded project aimed at categorical selection of users with running loans and providing them with a top up on existing loan - Architected a configurable model to cater frequent policy and pricing modelling - Integrated gift card with loans - Created a simulation environment to run experiment over existing customers base allowing increased funnel size and enhanced conversions - Integrated insurances attached with loans - Heading channel acquisition for new leads at Moneyview			
Wissen Technology		Software Engineer	July 2018 – Jan 2019

• Worked towards migrating downstream reporting for a leading BFSI client from traditional database scripts to in-memory processing henceforth reducing processing time by over 40% • Built a reconciliation tool aimed at error prone and faster transition to in-memory processing • Implemented an event based mechanism for feed processing assisted with priority scheduling thus improving the throughput		
Yantriks India Pvt. Ltd, (Bangalore/Plano, Texas)		Mar 2017 – Jun 2018
Job Title	Software Engineer	Mar 2017 – Jun 2018
Roles and Responsibilities	• Responsible for designing creative and scalable systems and software solutions that address	

business/technical needs in ever changing retail market		
• Created new APIs besides revamping existing ones to continuously meet the changing needs of the clients • Responsible for designing/coding and implementing Java REST Web Service APIs within an efficient Agile SDLC enabling the client to seamlessly integrate our product into their existing business tools		
Impacts and Deliverables	• Implemented ITopic for dynamically setting properties in production environment enabling flag based feature deployment and effortless rollback • Wrote Spark Job to modify chunks of data In Cassandra. Ensured data modification without impacting hazelcast node health. Hazelcast downtime decreased by over 30% • Integrated spring boot actuators to monitor SpringBoot app and gather metrics for health, log level etc to be displayed in app admin console saving hours of production support team effort • Designed and implemented solutions for online sales of a US retail giant to consider daily clearances, capacity management and sales exclusion. Saved \$3m for the client by reducing Items going Out of Stock by over 60% • Implemented features with Test driven approach to ensure near absence of Production bugs and brought code coverage of 24k+ lines of code from 27% to 70%	

Target Corporation India Private Limited, Bangalore		Jul 2015 – Oct 2016
Job Title	Associate Software Engineer	Jul 2015 – Mar 2016
	Engineer	Apr 2016 – Oct 2016
• Responsible for Front End development of our customer-facing app from requirement analysis to designing, coding, implementation, system study, documentation and testing. [SEP] • Acquired a clear understanding of the UI technology trends with the distinction of identifying & implementing new technologies according to company's requirement and upgrading the same. [SEP] • Designed and implemented expansion of sales categories for a gift registry from existing 3 domains to over 10+ divisions bringing 3 fold increase in revenue from the product.		

Luminous Power Technologies, Himachal Pradesh		May-Jun 2014
Job Title	Research Intern	
Overview	• Devised cell equalisation model for lead acid battery pack under constraints of inverter applications	
Approach	• Analysed the behaviour of cell characteristics when exposed to intensive charge/discharge cycles	
Impact	• Endorsed by battery R&D centre, design sent to electronics R&D for assessment
