

Abhishek Hegade

abhishekghegade.jobs@gmail.com / +9199011 20802 / Bangalore

Summary

Experienced DevOps Engineer with a strong background in designing, implementing, and managing **cloud-based solutions**, **Kubernetes clusters**, and **Helm charts** for deploying containerized applications. Skilled in automating **CI/CD pipelines**, **Infrastructure as Code (IaC)**, and optimizing system performance across cloud platforms. Expert in managing **Kubernetes resource allocation**, including auto-scaling, CPU/memory optimization, and ensuring high availability.

Proficient in **Istio** for microservices management and service mesh integration, as well as **metrics**, **logs**, and **traces** management using tools like **Splunk** and **Prometheus** to enhance observability and troubleshooting. Adept at collaborating with cross-functional teams to implement best practices, troubleshoot complex issues, and deliver seamless, reliable software deployment and operations.

A passionate advocate for driving **DevOps** transformation, improving infrastructure efficiency, and staying current with the latest trends in **cloud-native technologies** and **DevOps methodologies**

Experience

Lead Engineer

Fico • Bangalore

12/2024

- Designed, implemented, and managed **Kubernetes clusters** and **Helm charts** for deploying containerized applications in a cloud-native environment.
- Integrated **Istio** service mesh for managing microservices, ensuring secure, reliable, and observable service-to-service communication.
- Oversaw **metrics**, **logs**, and **traces** management using **Splunk**, optimizing infrastructure monitoring and troubleshooting.
- Managed **Kubernetes resource allocation**, including auto-scaling, CPU, memory, and storage optimization for performance and cost efficiency.
- Mentored a team of DevOps engineers, driving best practices in cloud infrastructure, security, and continuous improvement.

Software Engineering - ENGINEER 2

FICO • Bangalore

12/2022 - 11/2024

- Lead the design, implementation, and optimization of **CI/CD pipelines** for various applications and services. Incorporate advanced automation, testing, and deployment strategies into the pipeline.
- Take a lead role in diagnosing and resolving complex technical issues across the infrastructure applications, and pipeline. Implement proactive measures to prevent recurrence of issues
- Participate in cross-functional discussions and contribute ideas for improving collaboration between development and operations teams.

Software Engineering - ENGINEER 1

FICO • Bangalore

12/2021 - 11/2022

- Design, implement, and manage infrastructure using **Infrastructure as Code (IaC)** tools like Terraform, and Ansible. Optimize infrastructure for scalability, reliability, and performance.

Software Engineering - Associate

FICO • Bangalore

10/2020 - 11/2021

- Build, maintain, and improve CI/CD pipelines. Learn how to automate code integration, testing, and deployment processes. Helped troubleshoot issues related to the CI/CD pipeline and worked towards solutions.

Software Engineering - Intern

FICO • Bangalore

01/2020 - 09/2020

Gain an understanding of DevOps principles, practices, and culture. Familiarize oneself with the tools commonly used in the DevOps pipeline, such as Git, CI/CD tools (Jenkins) , Ansible, containerization (Docker) , and cloud platforms (AWS)

Skills

AWS (5 years), Jenkins (5 years), Docker (5 years), Kubernetes (4 years), Terraform (4 years), Ansible (4 years), Git (5 years)

Education

Information Science & Engineering

The National Institute of Engineering.

09/2020

Certificates

AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner – Foundational
