SUMMARY

Experienced in ASP.NET Core and Angular development, with a focus on US banking clients. Passionate about coding, I enjoy tackling complex challenges and crafting innovative solutions. Outside of coding, I find joy in watching football and am dedicated to maintaining a healthy lifestyle, reflecting my passion for fitness.

TECHNICAL SKILLS

Back End: ASP.NET Core, ASP.NET Web API, Entity Framework Core, JWT, gRPC, RabbitMQ, MassTransit

Front End: HTML, CSS, Angular, Bootstrap, Tailwind CSS

Programming Languages: C#, Java, JavaScript, TypeScript

Databases: SQL Server, MySQL, Redis, MongoDB, PostgreSQL

Cloud, DevOps & Version Control: Git, GitHub, Docker

Testing: XUnit, Moq, Integration Testing

Architecture & Design Patterns: Repository Pattern, Microservices, CQRS, DDD

WORK EXPERIENCE

Novigo Solutions Pvt Ltd

Mangaluru, India

Software Engineer

Aug 2023 - Present

- Leveraged RabbitMQ for Microservices Communication and Real-Time Notifications:** Designed and implemented inter-service communication using RabbitMQ in a banking application, enabling seamless message exchange between microservices. Developed a real-time notifications and alerts system to deliver low-balance alerts, payment reminders, and transaction receipts promptly and reliably to users.
- Performance Optimization with Redis Caching:** Designed and implemented Redis caching in a banking application to store frequently accessed data, including account information and transaction history, resulting in reduced database load and significantly faster response times for users.
- Integrated Multiple Third-Party Services into ASP.NET Core Banking Applications:** Successfully implemented and configured integrations with leading providers such as Plaid, PayPal, Google Maps, DocuSign, and Twilio Verify to enhance functionality for KYC, funding, e-signatures, asset verification, and user authentication, ensuring seamless interoperability and secure data transactions.
- Test Class Development for Improved Code Coverage:** developed and implemented test classes in ASP.NET Core to enhance code coverage, ensuring high-quality code by identifying bugs early and preventing regressions through thorough unit and integration tests.

Trainee Software Engineer (Angular, ASP.NET CORE)

May 2023 - Jul 2023

- I was involved in a project for an internal **Recruitment Management System (RMS)** that utilized **Angular v16** and **ASP.NET web API**.
- The application featured an implemented admin dashboard designed for HR personnel to manage and update student data.
- During the 2023 campus placements organized by Novigo Solutions, the application adeptly handled a student count exceeding 700, delivering a seamless experience for both students and HR personnel.

Krishworks Technology Innovations

Remote

Full-Stack Developer (ReactJS, Django, ExpressJS)

Jan 2022 - Nov 2022

- Contributed to the development of a dashboard for a client in the science and technology sector, where I configured **ExpressJS** for a Google Cloud function.
- In an **LMS project**, played a key role in developing database models and APIs using **GraphQL** and **DynamoDB** for a client specializing in energy solutions and services.
- Assistance in the development of a persistent video playback feature for the LMS project.
- Implemented a customizable certificate generator for the LMS project using ReactJS.

EDUCATION

Yenepoya Institute Of Technology

Mudbidri, Karnataka, India

Bachelor of Engineering in Computer Science

Jun 2019 - Apr 2023
