Skills

JavaScript, React js, Next js 14, Express js,
TypeScript, Node js, Whisper ai, Replicate ai,
Together ai, Solidity, Subgraph, MongoDB, MySQL,
Convex.

Professional Experience

Full Stack Developer

I am a Full Stack Developer. Currently I am working at SanTech Protocol as a Full Stack Developer. We specialize in build AI project, MERN App Project.

01/2023 – present
Ranchi, Jharkhand

Projects

Fee Management System [🔗](#)

I built the fee management system for NNGhosh College, which allows authorized users to add new student generate fee receipts, view daily, weekly, monthly, and half-yearly fee collections, as well as track salary collections. Additionally, users can view individual students' total fees, due fees, and paid fees, along with their receipts.

Quiz App [🔗](#)

I built a Quiz app where students can take quizzes, share them with others, and view their scores without logging in. Teachers must first register and log in, after which they can create quizzes or add questions in both Q&A and Poll formats.

Library Management System [🔗](#)

I have developed a library system application with two user roles: admin and student. If an admin login, they can add a book, add a student, edit a book, and delete a book. If a student login, they can only view books and reserve a book.

Story GPT [🔗](#)

In this project. I am use Next js, TypeScript, Tailwind Css(for Frontend), Replicate (for translate audio to text and image generate), Together ai(for prompt), Whisper ai (for record the user voice). Convex databse (for store the story), Clerk(for login system).

Home Service App

In this project. I am use Next js 14 (for froentend), Hypergraph Database(for store the record of User, Doctor, Nurse, etc...), Descope (for login system), Email js (for user contact to admin). data, Next js, Tailwind css (for frontend).
