### SUMMARY

Full-stack Engineer with 6+ years of experience in software development, specializing in .NET, modern JavaScript frameworks, cloud computing, and modern development practices such as DevOps and TDD. Familiar with both microservices and microfrontend architectures, and proficient in building scalable applications and streamlining workflows through automation.

### TECHNICAL SKILLS

- **Programming Languages** - C#, Javascript + Typescript
- **Frontend Frameworks** - Angular, React
- **Backend Frameworks** - ASP.NET, Node.Js
- **Databases** - MSSQL, Mongo DB, Firestore
- **Cloud Computing** - Google Cloud Platform
- **DevOps** - Docker, Kubernetes, GitHub Actions

### WORK EXPERIENCE

#### SENIOR SOFTWARE ENGINEER

( April 2024 - November 2024 )

##### UST Global

- Managed a suite of legacy applications related to supply chain and demand forecasting for a leading semiconductor company, streamlining operations by eliminating technical debt and improved system performance by 15%.
- Designed a prototype to modernize the platform by migrating to a client-server architecture, implementing caching strategies, and hosting on Kubernetes-managed cloud services, resulting in a 25% reduction in average response time.

#### SENIOR FULLSTACK DEVELOPER

( August 2021 - April 2024 )

##### Conaug Technologies

- Led the development of an e-commerce platform, a food delivery application, and a social media module, overseeing 75% of the product lifecycle.
- Architected cost-effective serverless solutions on GCP using cloud functions, cloud tasks, and spot virtual machines, reducing infrastructure costs by 30%.
- Implemented containerization, automated testing, and CI/CD workflows, enhancing team productivity and reducing deployment cycles by 40%.
- Revived a struggling project by resolving nearly 100% of outstanding issues and critical bottlenecks.

## SOFTWARE ENGINEER

( July 2020 - August 2021 )

### Compdhenu Software Solutions

- Developed applications for an international music school franchise, optimizing admin processes and enabling student progress tracking, serving over 5,000 active users monthly.
- Enhanced existing modules to fully leverage TypeScript, improving code maintainability, which resulted in a 30% decrease in the time spent on debugging and troubleshooting.
- Automated routine tasks using job schedulers, saving over 10 hours of manual effort weekly.

## ASSOCIATE SOFTWARE ENGINEER

( October 2016 - April 2018 )

### Glenmark Pharmaceuticals

- Collaborated effectively with cross-functional teams to design and develop internal software applications, ensuring alignment with organizational requirements.
- Conducted comprehensive code reviews and debugging sessions, identifying and resolving critical issues early in the development cycle.
- Provided hands-on training to over 25 end-users, resulting in a significant increase in user satisfaction and 50% reduction in support tickets.

## PROJECTS / PUBLICATIONS

---

### VERY-OWN

A Shopify-like platform for building custom services such as teaching academies and stores, powered by .NET, JavaScript frameworks, Docker, Kubernetes, Google Cloud Platform (GCP), and utilizing Microfrontend and Microservices architecture.

## EDUCATION

---

### BACHELOR OF COMPUTER APPLICATIONS

( June 2013 - April 2016 )

### Dnyanprasarak Mandal's College, Goa

- Database Management Systems
- Operating Systems
- Computer Networking
- Data Structures and Algorithms
- Object Oriented Programming
