SUMMARY

Detail-oriented Software Test Engineer with over six years of experience in functional testing and extensive knowledge of manual testing methodologies. Proven track record of enhancing client experiences through meticulous testing of enterprise-level products. Aiming to leverage expertise to contribute to organizational growth and drive quality assurance initiatives.

EXPERIENCE

QA Engineer, 03/2023 - 11/2024

Clearfeed - Bangalore

- Worked with Agile and Scrum methodologies to accomplish project milestones and meet demanding timelines.
- Wrote and updated manual test cases for team use, maintaining optimal organization for maximum productivity.
- Participated in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems.
- Participated in daily stand-up meetings to discuss progress on projects and tasks assigned.
- Conducted functional, regression, performance, integration and user acceptance testing.
- Performed root cause analysis for detected faults and developed corrective actions.
- Documented, triaged, and managed defects in software and worked with developers to facilitate timely resolutions.

QA Engineer, 04/2021 - 02/2023

Phablecare - Bangalore

- Assessed requirements, specifications, and technical design documents to deliver constructive feedback.
- Maintained traceability matrix between business requirements and test scenarios and test cases.
- Coordinate effectively to ensure optimal test execution.
- Identified and documented software defects in bug tracking systems like JIRA.
- Conducted unit, integration, system and regression testing to verify application functionality.
- Develop and apply testing processes for new and existing products to meet client needs.
- Facilitated discussions among team members to establish necessary system specifications.
- Utilized Agile methodology principles throughout the development process including daily stand-up meetings and sprint planning sessions.
- Evaluated the function, performance, and design compliance of every product against design standards and customer needs.
- Presented comprehensive overviews of new functionalities to all stakeholders after each release.
