COURSEWORK

Big data 101 provided by IBM

Moving data into Hadoop provided by IBM

Digital marketing from Google Digital
Garage

Advanced Machine Learning

Artificial Intelligence + Practicum

SKILLS

HARD SKILL

python • Data science • Foundation of
Deep Learning • Java • R • Hadoop • My
SQL • CSS • PHP • PY Torch • Tensor
Flow

SOFT SKILL

Cultural Intelligence • Design Thinking •
Networking • Collaborative • Business
Acumen • Analytical Thinking

INTERSTS

Football

Craft and Arts

Travelling

PROFILE

"Innovative AI Data Science Engineer adept at transforming data into actionable insights and driving business growth. Passionate about leveraging cutting-edge technologies to tackle complex challenges and pioneer breakthrough solutions. Ready to drive transformative outcomes in a dynamic team environment."

INTERNSHIP

ARTIFICIAL INTELLIGENCE AND COMPUTER VISION | TECHMAGHI

May-2023 | Kerala

Engaged in hands-on projects exploring AI algorithms and computer vision techniques. Contributed to the development of machine learning models and image processing applications. Gaining practical experience in the field.

HUMAN RESOURCE INTERN | TOP TROVE FOUNDATION

August-2021 | Delhi

Hands-on experience in recruitment, employee relations, and training initiatives. Contributed to talent acquisition processes and fostered a positive workplace culture.

VOLOUNTEERSHIP

CAMPUS AMBASADOR March-2023

Represented Tryst IIT Delhi with enthusiasm and professionalism, promoting campus events, initiatives, and programs. Engaged with peers to foster a sense of community and involvement, contributing to the overall campus experience.

ACHIEVEMENT

LOR | TOP TROVE FOUNDATION

Received a Letter of Recommendation for outstanding performance and contributions in Human Resource Intern. Demonstrating excellence and commendable dedication.

PROJECTS

COMICBOOK GENERATOR

Employs natural language processing, image rendering, and dynamic layout algorithms to automate comic book creation from user input. Offers customizable features for creators to bring their stories to life effortlessly

HAND GESTURE FOR A MOUSE POINTER

Utilizes computer vision algorithms to interpret hand movements. Gestures recognized through image processing techniques. Index finger tracked for navigation, with additional recognition for clicking and scrolling actions. Enables intuitive interaction with digital interfaces.
