ahad123211@gmail.com 

Bhopal, MP 

SUMMARY

DevOps Engineer with extensive expertise in architecting and optimizing infrastructure on GCP and AWS environments. Skilled in implementing and managing cloud-based infrastructure, ensuring security, scalability and reliability, and skilled in containerization with Docker and Kubernetes along with the CI/CD components.

EDUCATION

Lakshmi Narain College of Technology & Science

Bachelor of Technology in Computer Science
8.53 CGPA 2021

Satyam Convent H. S. School

XII(Senior Secondary) Maths and Science
86.8% 2017

SKILLS

- Cloud Platforms:** AWS, GCP
- Containerization:** Docker, Kubernetes
- Infrastructure as Code:** Terraform, Ansible
- CI/CD:** Gitlab CI, GitHub Actions, Jenkins
- Operating Systems:** Linux (Ubuntu)
- Scripting:** Bash, Python
- Version Control:** Git
- Database:** Elasticsearch, MongoDB
- Monitoring & Logging:** Grafana, Kibana
- Others:** Jira, Azure, ADO, Networking, Troubleshooting, and Security

CERTIFICATIONS

- AWS Certified: DevOps Engineer - Professional
- AWS Certified: Solutions Architect - Professional
- Google Cloud Certified: Professional Cloud Architect
- Google Cloud Certified: Professional Cloud DevOps Engineer
- Hashicorp Terraform Associate
- Microsoft Certified: Azure Fundamentals

PROFESSIONAL EXPERIENCE

Quantiphi | DevOps Engineer

Oct 2021 - Present | Bangalore, India

- Led the DevOps team in a GenAI product environment, collaborating with business stakeholders and architects to deliver scalable solutions within deadlines.
- Responsible for managing documentation and overseeing release activities to ensure smooth, efficient deployments.
- Containerized applications with Docker and orchestrated their deployments on Kubernetes, including the development and deployment of LLMs to ensure scalability and optimal resource utilization for AI-driven applications.
- Established comprehensive CI/CD pipelines on GitLab to streamline deployment processes, ensuring high availability, scalability, and optimized resource utilization.
- Worked across a range of services in GCP and AWS, including Compute Engine, EC2, GCS, S3, Secret Manager, Cloud Run, ECS, Fargate, Lambda, GKE, EKS, IAM, VPC Networks, NAT, DNS, WAF, Cloud Armor, Route 53, Load Balancers, Firewalls, Vertex AI, Bedrock, and more.
- Automated deployments using Terraform, improving deployment speed, consistency, and automation across multiple cloud environments.
- Optimized resource allocation and reduced application costs by 30% through identifying and minimizing underutilized services.
- Implemented advanced security protocols that significantly reduced application vulnerabilities and enhanced data protection across the infrastructure.

Quantiphi | DevOps Engineer Intern

June 2021 - Oct 2021 | Bangalore, India

- Acquired knowledge of various GCP and AWS services, focusing on applying them effectively in the HCLS domain.
- Collaborated with the team to develop and implement innovative solutions and driving operational excellence.
