- Worked in following frameworks
Laravel, Cake PHP, Magento, Slim, Code Igniter
- Knowledge in following software
MSSQL Management Studio, Redmine, GitLab, Forge, Slack, Trello, MySql Workbench, Postman

Work Experience

- Tech Lead at Ipix Tech Services, Calicut (August 2022 – Present)

Leading a team of 25 professionals, overseeing their daily tasks, guiding project development, and ensuring effective collaboration to meet organizational goals. In addition to leadership responsibilities, I contribute architectural concepts to the project, helping shape the structural and technical framework. My role involves managing diverse skill sets, facilitating communication, and fostering a productive work environment to ensure high performance and consistent results.

- Senior Engineer at Gligx, Dubai (February 2022 – August 2022)

Developed several websites and provided comprehensive APIs to support the mobile applications associated with these websites. This process involved end-to-end architectural design and implementation, ensuring that both the websites and the APIs met high standards of performance, scalability, and security.

- Senior Web Developer at SMITS (October 2020 – December 2021)

I have been actively involved in a significant ERP project named Wallpost, where I successfully managed a team of 8 members. My responsibilities encompassed overseeing the team's output through thorough code reviews, ensuring adherence to best practices and high-quality standards. Additionally, I was responsible for the design and development of various APIs, contributing to the project's overall architecture and ensuring seamless integration with other system components. The project was developed using a robust tech stack that included MySQL, Vue.js, Yii2, and Laravel.

- Senior Software Engineer at IPIX Tech Services (August 2016– October 2020)

I have actively contributed to the development of several projects utilizing a wide range of technologies, including MySQL, CakePHP, CodeIgniter, Laravel, Angular, and Ionic. Additionally, I have been a key member of a team consisting of 8 professionals, collaborating to deliver high-quality solutions and ensuring the smooth execution of each project. My role in these projects involved both hands-on coding and contributing to the overall architecture and development strategy.

Recent Projects

- The GrandMarche - Inventory Management System

GrandMarche is an inventory management system of a large scale B2B distributors. The staffs in their organization can manage stocks, stock transfers, orders, receipts from the customers, etc. in this application. Also they can export the reports from the system. (Laravel, JQuery, MySQL, Git)
