Career Objective

To secure a challenging position in a forward-thinking organization that allows me to leverage my knowledge and skills while staying at the forefront of the latest trends and technologies.

Technical Skills:

- Web Application Development: Python, Django, ORM
- Version Control: GIT, GitHub
- Cloud Computing: AWS (S3, EC2, Lambda Functions)
- API Integration: Django Rest Framework
- Database Management: MySQL, PostgreSQL

Accenture (July 2024 – Sep 2024) || Python Developer

- Completed hands-on training in Python and SQL, rapidly acquiring the skills needed to contribute to the development team.
- Assisted in the development of web applications using Django, applying newly gained knowledge to implement key features.

Persistent Systems (Dec 2022 – Jan 2024) || Python Developer

- Interacted with clients to understand requirements and provided regular status updates.
- Collaborated as a Python developer, implementing enhancements and working on API integration using Django, Flask.
- Utilized Django and Flask frameworks to build scalable web applications, ensuring high performance and reliability
- Active participation in daily Agile scrum meetings and technical debugging.
- Investigated and troubleshooted application issues, recommending necessary software modifications.
- Provision and maintain EC2 instances, manage scalable storage with S3, develop event-driven applications with Lambda, and set up comprehensive monitoring with CloudWatch.

L & T Technology Service Ltd. (May 2022 – Sep 2022) || Python Developer

- Worked as a Python full-stack developer, closely collaborating with clients for requirement gathering and implementation using Python, MYSQL.
- Implemented RFQ (Request for Quote) process, streamlining pricing for sales and distributors.
- Actively participated in daily scrum meetings.

Maveric Systems (Jan 2022 – May 2022) | | Python Developer

- Designed, developed, and tested web applications using the Django web framework.
- Created APIs using Python and Django.
- Stayed updated with the latest advancements in Communication Technology, integrating innovative approaches for sustained competitive advantage.
- Ensured code quality, maintainability, and efficiency in implementing business requirements.

TCS (Jan 2020 – Dec 2021) | | Python Developer

- Collaborated with designers, analysts, and developers to write and execute efficient Python programs and database queries.
- Followed coding standards and guidelines for Python programming.
- Analyzed client requirements, translated them into technical specs, and developed core business functionality.
- Investigated and troubleshooted application issues, recommending necessary software modifications.

Academic Credentials

- B. Tech (IT) from KITSW.
- Intermediate from NRI Jr. College
