

Ajay Kale

Azure Data Engineer

I am a highly experienced Data Engineer with 2 years of experience, specializing in various data technologies including Snowflake, Azure, Pyspark, and Spark. My expertise lies in data cleaning & data Transformations using Snowpipe, SnowSQL, making me proficient in data sharing, analysis, and reporting. I have a strong background in Azure Data Factory, Azure Databricks, Azure Synapse and manage Big data. My deep understanding of Snowflake's core features including Time Travel, Zero copy cloning, Stream & Tasks, star schema and snowflake schema, allows me to design scalable ETL/ELT processes. Proficient in SQL, Python, SQL Server, Oracle, data warehouse and data pipelines infrastructure, I ensure seamless data processing and data management in the Big Data landscape and have understanding of big data technologies like Hadoop and Spark.

WORK EXPERIENCE

Azure Data Engineer

Intech Software Solutions Pvt Ltd

07/2023 - Present,

Roles & Responsibilities

- Designed and implemented ETL pipelines using Azure Data Factories and Databricks, collaborating with cross-functional teams to understand business requirements and provide insights into data analysis and reporting
- Optimized data pipelines and queries, reduction in query execution time and improving overall system performance. Perform tasks such as writing scripts, calling APIs, write SQL queries, etc.
- Implement data lakehouse solutions on the Databricks platform, including data pipelines, data warehousing, and machine learning workflows.
- Collaborated with cross-functional teams to understand and address data requirements, translating business needs into technical solutions.

INTERNSHIP

Graduate Trainee

Intech Software Solutions Pvt Ltd

07/2022-07/2023

Roles & Responsibilities

- Designing platforms for processing a significant amount of data.
- Building large databases Developing analysis and technology intelligence tools.
- write code to develop, maintain, and optimize data pipelines, as well as to implement data storage solutions and data processing systems.
- Stayed updated with the latest industry trends and best practices, continuously improving data engineering processes and contributing to the organization's data-driven success.

EDUCATION

Bachelor of Technology

Sanjivani college of Engineering Kopargaon

Computer Engineering

Savitribai Phule Pune University

SKILLS

PySpark

SQL

Snowflak

Azure

Python

ADF

SnowSQL

Snowpipe

Hadoop

Hive

Azure Data Bricks

Airflow

ETL

ELT

Linux

Git/Github

Azure Devops

ADLS

Azure Synapse

Azure Key Vault

Data Warehousing

PROJECTS

RFM Analysis: Driving Business Growth through Customer Insights

- Environments: - Azure, ADLS, Snowflake, Snowpark.
- Applied RFM analysis to E-commerce and Retail data, enhancing revenue and satisfaction through predictive insights and targeted marketing strategies.
- Engineered and executed integrated data pipelines (CSV, JSON, API, RDBMS) stored in cloud (Azure/S3)..
- Architected structured layers (landing, staging, historic) and final tables for seamless data flow, empowering informed decisions and actionable insights.
- Crafted customized views aligning with business goals, enabling precise segmentation and strategic campaigns based on RFM analytics.
- Implemented strategies for high-value segments (loyal, big spenders, at-risk), optimizing engagement and loyalty through personalized marketing initiatives.

Product Distribution and Sales Generation in Retail Domain.

- Environments: - Sql Server, ADLS Gen2, Azure Databricks
- Extracting Data from ADLS Gen2 to Azure Databricks and creating the different Dataframe from csv file format.
- Demonstrated proficiency in data cleaning and transformation using Pyspark, including handling missing values and aggregating data.
- Wrote SQL queries to retrieve and manipulate data stored in Snowflake, incorporating aggregations, joins, and filtering.
- Collaborated closely with Senior Data Engineer and team members to understand data requirements and ensured the processed data met their needs.

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate (DP-203) Issued june 2024 - Expires june 2025.(2322A5A333F63028).
