SENIOR SOFTWARE ENGINEER

SUMMARY

- IT Professional with over 6 years of experience with a proven record of achievements that includes software development.
- Experienced Web Developer adopt in all stages of advanced web development. Knowledgeable in user interface, testing, and debugging processes.
- Equipped with a diverse and promising skill-set.
- Proficient in an assortment of technologies, including ASP.NET MVC Core, C#, IIS, and Microsoft SQL Server.
- Able to effectively self-manage during independent projects, as well as collaborate in a team setting.
- Adept in trouble-shooting and working to offer solutions.

EDUCATION

- **(61%) Bachelor of Science in Computer Science (Bsc cs)** from **Alpha Arts and Science College** affiliated to **University of Madras**.
- **(58%) HSC** from **Padma subramaniam bala bhavan matriculation higher secondary school**.
- **(65.6%) SSLC** from **Padma subramaniam bala bhavan matriculation higher secondary school**.

SKILL SET

- **Programming Language** : C#, Asp.Net MVC, Web-API, MS-SQL, HTML, CSS, Bootstrap, Webservice, JQuery
- **Development Tool** : Microsoft Visual Studio 2019, Visual Studio Code
- **DataBase** : SQL Server 2017
- **Version Control** : VSS, GIT

PROFESSIONAL EXPERIENCE

Organization	Position	From	To
Uncia Technologies Pvt Ltd	Senior Technical Engineer	May 2024	Oct 2024
GI Technology Pvt Ltd	Senior Software Engineer	May 2020	Oct 2023
Repute Infotech and Enterprises Ltd	Junior Programmer	Feb 2018	May 2020

Last Project Summary

- **Project Name** : SCF (Supply Chain Finance)
- **Position** : Senior Technical Engineer
- **Role** : Involved Designing, coding, Unit Testing, Timeline for Module development, Code Review.
- **Technologies** : ASP.Net MVC Core, MS-SQL, Web Service, Web-API, JQuery,
- **Duration** : May 2024 to Oct 2024

Responsibilities :

- Contributed to the development of a three-tier technical architecture, encompassing the User Interface, Business Layer, and Data Access Layer, with successful implementation.
 - Collaborated closely with Business Analysts to gather requirements and prepare specification documents, providing regular project updates.
 - Utilized ADO.NET and Entity Framework for backend connectivity and data management within SQL Server, including the creation of stored procedures for data retrieval and updates.
 - Worked with microservices architecture to enhance both frontend and backend components, improving system scalability and maintainability.
 - Led application design and code review processes, ensuring high-quality deliverables.
 - Implemented Azure for code versioning and continuous integration, streamlining deployment processes.
 - Estimated efforts for new enhancements and project tasks.
 - Mentored and guided a junior team member, fostering skill development and collaboration within the team.
-

Project Summary

- **Project Name** : FASTag
- **Position** : Senior Software Engineer
- **Role** : Involved Designing, coding, Unit Testing, Timeline for Module development, Code Review.
- **Technologies** : ASP.Net MVC, MS-SQL, Web Service, Web-API, JQuery
- **Duration** : May 2020 to Oct 2023

Responsibilities :

- Involved in development of a three level technical architecture which includes the User Interface, Business layer and Data Access Layer and successfully implemented the architecture.
 - Involved in the gathering and preparation of requirements specification documents and regular interaction with the Business Analysts on project updates.
 - ADO.NET is used to connect, retrieve and update the data in the SQL Server database.Used SQL to write stored procedures to retrieve and update the data in data stores.
 - Integration with 3rd Party Middleware software to process credit/debit authorizations.
 - Developed an Web pages for Mobile Banking Application in Mobile and added Auto Recharge Features in Mobile APP using Credit Card.
 - Application design, Code Review and ensuring the Quality of deliverables.
 - Estimation of the new enhancements and tasks.
-

Project Summary

- **Project Name** : CRM Management System
- **Position** : Junior Programmer
- **Role** : Involved Designing, coding, Unit Testing.
- **Technologies** : ASP.Net, MS-SQL, Web Service, JQuery
- **Duration** : Jan 2020 to May 2020

Responsibilities :

- Designed User Interface using ASP.NET Pages,HTML and style Sheets and C#.NET.
 - Used C# in developing the business logic and implemented the Object-Oriented Programming Functionalities.
 - Used Ajax in order to provide pleasant client-side experience with jQuery, Java script and JSON.
 - Implemented agile methodologies and Web Services in the application.
 - Developed stored procedures, functions and database tables in MS SQL Server database.
 - Used VSS for Version and Source Code control.
-

Project Summary

- **Project Name** : TTS (Track and Trace System)
- **Position** : Junior Programmer
- **Role** : Involved Designing, coding, Unit Testing.
- **Technologies** : C#, MS-SQL, Winforms
- **Duration** : Feb 2018 to Dec 2020

Responsibilities :

- Used C# in developing the business logic and implemented the Object-Oriented Programming Functionalities.
 - Used web Services in the appropriate scenarios to communicate with other applications.
 - Implemented agile methodologies and Web Services in the application.
 - Used VSS for Version and Source Code control.
 - Created database tables using SQL Server 2008 and using stored Procedures and functions.
 - Involved in writing Stored Procedures and Functions using SQL language for retrieving data from SQL Server Database.
 - Developed various reports using Crystal Reports based in the business requirements and export to Excel and PDF files.
 - Involved in production support of the application.
