PROFILE SUMMARY

SDE-1 with **over 2 years** of experience specializing in **software development**, holding a Bachelor's degree in Computer Science Engineering from **SRM University**. Proficient in applying programming language constructs to develop highly **complex** and **scalable business applications**. Possesses strong **technical aptitude**, excellent mathematical skills, and a solid foundation in **computer science principles**. Excels in navigating complexity and excels in **collaborating** with colleagues to **deliver projects** within **tight deadlines**. Currently seeking exciting opportunities to further contribute and grow.

EDUCATION

Degree/Certificate	Institute	CGPA/Percentage	Year
B.Tech in Computer Science Engineering	SRMIST, Chennai	9.4	2022
Class XII, CBSE Board	Devamatha CMI School	91.00%	2018
Class X, CBSE Board	St.Antony's School	96.25%	2016

EXPERIENCE

- **Software Development Engineer - 1**

July 2022 - September 2024

Samsung R&D Institute India, Noida

Noida, India

- * Led development of the Together module in Samsung Health for Mobile and Wear, responsible for feature development, performance optimization, and unit testing, impacting millions of users globally.
 - * Executed the implementation of over **20 features** for Mobile, watch6 and watch7, consistently delivering updates to the Play Store.
 - * Leveraged **Kotlin Coroutines** for asynchronous programming, improving app performance and user experience by managing background tasks efficiently.
 - * Integrated **RESTful APIs** using **Retrofit**, ensuring reliable data retrieval and streamlined communication between mobile applications and backend services.
 - * Refactored the Together Module from MVP to **MVVM architecture**, improving maintainability, scalability, and separation of concerns.
 - * Implemented **Jetpack Compose** for tiles, modernizing the app's UI components previously relying on deprecated remote views.
 - * Collaborated closely with key **stakeholders**, making **business trips to Korea's** head office to align project requirements and worked hands-on with head office engineers.
- **Summer Internship**

Jan 2022 - June 2022

Samsung R&D Institute India, Noida

Noida, India

- * Contributed in the development of features using Java and Kotlin under the guidance of senior developers.
 - * Developed several Android applications using Kotlin, MVVM architecture, and third-party integrations, focusing on scalable, user-friendly solutions

PROJECTS

- News App**: Developed an Android news application using Kotlin, leveraging Clean Architecture with MVVM. The app fetches and displays news from a remote API, features search functionality, favorite articles, detailed views, and offline support with Room for efficient data handling and maintainability.
- Food Delivevry App**: Developed a comprehensive food delivery application and an admin management app using Kotlin, integrating Firebase for authentication and database, with features like menu management, order history, user authentication, and profile management.

TECHNICAL SKILLS

- Programming Languages**: Kotlin, Java, C++
- Other Skills**: Android **Architecture Components**, Git and Version Control, Android SDK, Android **Jetpack Components**, MVVM architecture, **Reactive programming** (RxJava/RxKotlin), Dependency Injection (Dagger/Hilt), **Coroutines**, JSON Parsing, SQLite Database, Performance Optimization, Debugging and troubleshooting, Code review and collaboration, APIs development.
