Chennai, India

Skilled software engineer with a strong foundation in computer science. Expert in crafting efficient, scalable solution to enhance user experience and drive technologies innovation.

WORK EXPERIENCE

Junior Software Engineer Fuji Electric India Pt Ltd, Perungudi.

06/2023 - Present

Chennai, India

Achievements/Tasks

- It is a robust platform designed to enhance collaboration between suppliers and buyers. The application facilitates seamless order management, inventory tracking, and invoice processing for outlets. Built using Java Spring Boot, the system provides a reliable, scalable, and modular architecture that integrates with Azure DevOps for continuous development, integration, and deployment

Junior Software Engineer Swag Tech Solutions, Guindy.

06/2021 - 05/2023

Chennai, India

Achievements/Tasks

- This project focused on enhancing a critical billing and pricing platform used across 41 markets for transaction banking and insurance customers
- I primarily worked with Java (JDK 17), Spring Boot 3.X, Hibernate 6.X, and Spring Data JPA, alongside Oracle SQL, Maven, and Azure DevOps for CI/CD pipelines. My hands-on experience with these technologies, combined with my problem-solving approach, has equipped me to handle complex system migrations and improvements efficiently.

EDUCATION

Bachelor of Information Technology Anna University / Velammal Engineering College

08/2017 - 10/2021

Chennai, India - 7.5 CGPA

Co-Curricular

- Member of math and coders club

XII - BioMaths

State Board / Quaide Millath Matric Hr. Sec.School

2017

Vedaranyam, India - 88.4%

Co-Curricular

- Member of math club
- Badminton player

SKILLS

Core Java / J2EE

Spring Boot

Hibernate

Microservices

SQL

Postgresql

Git

PERSONAL PROJECTS

Zee mart Supplier and Buyer Application [Fuji Electric India Pt Ltd]. (06/2023 - Present)

- The Zee mart Supplier and Buyer Application for Outlets is a robust platform designed to enhance collaboration between suppliers and buyers. The application facilitates seamless order management, inventory tracking, and invoice processing for outlets. Built using Java Spring Boot, the system provides a reliable, scalable, and modular architecture that integrates with Azure DevOps for continuous development, integration, and deployment. With the adoption of Azure DevOps, Zee mart benefits from automated CI/CD pipelines, ensuring quick and consistent deployment of new features. The platform supports real-time communication between outlets and suppliers, allowing for efficient order tracking, inventory updates, and payment processing.

Pricing and Billing System Application [Swag Tech Solutions]. (06/2021 - 05/2023)

- This project focused on enhancing a critical billing and pricing platform used across 41 markets for transaction banking and insurance customers. My key contributions included migrating around 3,900 Hibernate Criteria Queries to align with the latest Java standards, improving system stability, security, and scalability, and optimizing the system to handle large transaction volumes from 21 third-party systems. Additionally, I developed robust error-handling mechanisms and created comprehensive documentation and training materials for both users and administrators.
