☎ +91 – 9405387900

Core Competencies

- Agile Methodology
- Software Development Lifecycle (SDLC)
- Enhancement, Production Support
- Performance Tuning
- Defect Resolution & Design Optimization
- Change Requests Management
- Troubleshooting/ Documentation
- Software Development & Maintenance
- Requirement Gathering
- Integration Testing
- Incident Resolution

Technical Skills

- Core Java
- OOPs, Collection, Multithreading, Exception Handling, JDBC
- Spring Boot
- Hibernate
- MySQL
- Servlets & JSPs
- Spring Security
- Angular
- HTML, CSS
- JavaScript
- Git, BitBucket
- Web Services & MicroServices
- Eclipse, STS-4, IntelliJ Idea
- Windows OS

Soft Skills

- Communication
- Collaboration
- Planning
- Problem-solving
- Time Management

Personal Details

Date of Birth: 21st June 1996

Languages Known: English, Hindi and Marathi

Location: Pune

Akash D Giri

Software Engineer

Profile Summary

- Experienced **Java** and **J2EE** developer with **over 2.2+ years** of experience in designing, implementing, and enhancing applications.
- Skilled in **Core Java** and **Advanced Java**, specializing in **OOPs**, **Exception Handling**, **Collection**, and **Multithreading**.
- Experienced in crafting applications utilizing **Spring Boot**, **Hibernate**, and **Microservices** architecture.
- Familiarity with **Java 1.8 features**, including Lambda expressions, Streams, and Interfaces, enabling the creation of efficient and modern applications.
- Well-versed in **Spring Security** and **JWT Token**, ensuring secure and reliable user authentication and authorization.
- Having good knowledge in **Servlets**, **JSP**, and **JSTL tags**, contributing to the development of dynamic web applications.
- Installing and configuring **MySQL database**, creating the required database schema, and ensuring data integrity.
- Skilled in **API testing and debugging using Postman**, ensuring the seamless integration and functionality of APIs.
- Having good knowledge in **JUnit and Mocking**, enabling robust and reliable unit testing of applications.
- Possesses foundational knowledge of **Angular**, expanding the skill set to work with modern front-end technologies, including **HTML**, **CSS**.
- Designed and developed responsive web applications using the **Angular framework**, adhering to best practices and coding standard.
- Utilized **Git for version control**, streamlining collaborative development and code management processes.
- Familiarity with **Agile Methodology**, successfully delivering projects in a collaborative and iterative development environment.

Education

- **B.Tech.** from Dr. Babasaheb Ambedkar Technological University, Lonere, Raigad (2020)
- CGPA: 7.59

Previous Work Experience

Software Engineer | Volkswagen Group Technology Solutions India, Pune | Aug'22 – May'23

Associate Software Engineer | Molars Technologies Pvt. Ltd., Pune | May'21 – Aug'22

Key Result Areas:

- Successfully designed, coded, tested, and debugged Java-based software applications, ensuring their proper functionality and adherence to project requirements.
- Worked closely with product managers, designers, and other developers to understand project goals, identify technical requirements, and deliver high-quality software solutions within specified timelines.
- Contributed to the design and development of software system architectures, evaluating technical feasibility, proposing efficient solutions, and making informed recommendations to support business requirements.

Projects

Project Name 1:	R360 (Resource & Project Management System)
Role:	Team Member
Team Size:	7
Process Type:	Agile Scrum Process
Tools Used:	Core Java, Spring Boot/MVC, Hibernate, Spring Security, Web Services, MicroService, MySQL & Angular, HTML & CSS etc.

Description:

R360 is an internal project of Volkswagen Group, designed to efficiently manage and optimize resources within the organization. R360 focuses on maintaining data related to employees and projects within the organization.

The R360 application facilitates various functionalities such as: -

- Resource details.
- Propose New Positions based on Project Requirement – *Sync with my. Serve*
- Track Hiring Progress – Sync with SuccessFactors.
- Resource Allocation for Project Billing.
- Generate Invoice (WBS).

Key Result Areas:

In this project, I am working as a team member, and **my roles and responsibilities** include:

- Conducting requirement analysis, understanding project needs, and gathering necessary information for backend functionality.
- Designing and implementing Restful Web services using Spring Boot, including the development of controllers, services, and repositories.
- Established a Controller Layer to handle the project’s functionality.
- Implemented an abstraction based Service Layer to enhance code modularity and maintainability.
- Developed Repositories in Spring Boot to facilitate efficient database operation.
- Installing and configuring MySQL database, creating the required database schema, and ensuring data integrity.
- Writing unit tests to ensure code reliability, and conducting debugging to identify and resolve any issues.
- Utilizing Postman for API testing and debugging purposes, verifying the functionality of the implemented services.
- Utilized maven to manage all necessary dependencies for the project.
- Implementing Spring Security and JWT Token for secure user authentication and authorization.
- Assisted in the migration of legacy codebases to the Angular framework, enhancing maintainability and performance.
- Collaborated with developers and testers to optimize database queries and improve performance.
- Collaborating with the team to ensure proper knowledge sharing and effective communication.
- Analyzing the program to implement code changes based on business requirements and project updates.

Declaration

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
