WORK EXPERIENCE

AIMLEAP, Junior Data Analyst

11/2023 – present | Bengaluru, India

- Collaborate with teams to identify relevant data sources both within the organization and externally.
- Extract data from databases, spreadsheets, APIs, and other sources using tools like SQL, Python, or data extraction tools.
- Cleanse and preprocess raw data to remove inconsistencies, errors, or missing values.
- Transform data formats or structures to make it suitable for analysis.
- Ensure data adheres to standards and conventions for consistency.
- Identify and understand websites containing valuable data for analysis.
- Utilize web scraping tools (e.g., BeautifulSoup, Scrapy) to extract data from websites.
- Validate and clean scraped data to ensure accuracy and reliability.

Softnet World (Intern), Data Analyst

04/2023 – 10/2023 | Delhi, India

- Processing, cleaning and verifying the integrity of data for analysis.
- Performed initial data investigation and exploratory data analysis using libraries like Matplotlib, Seaborn
- Provide business insights and analysis using engaging visualization by using Business Intelligence tool like tableau, Power BI
- Built various regression and classification models by using framework like SciKit Learn
- Enhance machine learning / deep learning algorithms and techniques based on data.

PROJECTS

Customer Loan Status Prediction Analysis

- Problem statement: Predict whether a loan applicant will be approved or disapproved.
- Key Role: Data collection, Data preprocessing, Data exploration.
- Feature engineering, Model training.
- Model selection: machine learning algorithms such as logistic regression, decision trees, and random forest.
- Model Evaluation: Accuracy(98%).
- Model deployment:AWS Service (EC2)

Churn rate prediction in (E-commerce Sector)

- Problem statement: predicting customer churn rate for a company's service.
- Key Role: Tools and technologies: Python, SQL, Scikit-learn, Pandas, and Tableau.
- machine learning algorithm: Supervised learning algorithm
- Data preprocessing: data cleaning, feature engineering, data transformation.
- Model selection:-Logistic Regression, KNN, Decision
- Tree, Naive Bayes, SVM, ANN

EDUCATION

Bachelor Of Engineering(ME),

08/2016 – 07/2020 | Nagpur, India

Rashtrasant Tukadoji Maharaj Nagpur University

TECHNICAL SKILLS

- **Machine learning:** Supervised And Unsupervised Learning
- **Python/ML:** List, dictionary, tuple, set libraries: Matplotlib, Seaborn, Pandas, Numpy, Sklearn, NLP, Web Scraping.
- **Languages:** Python, oops, JavaScript, HTML/CSS
- **Tools:** Tableau, Power Bi Desktop, Anaconda, VS Code, Jupyter, Microsoft SQL Server, Ms excel,
- **Deployment:** AWS
- **Database:** MYSQL, PostgreSQL
