+91-8053200290 | akhilkhurana.29@gmail.com

Summary:

Software Engineer with expertise in Python development and cloud infrastructure management. Skilled in provisioning and managing Azure compute resources, optimizing virtual machines, and automating solutions. Experienced in developing Python-based applications, working with PostgreSQL databases, and implementing web scraping solutions using BeautifulSoup. Adept at troubleshooting and collaborating with cross-functional teams to deliver reliable and scalable solutions in both cloud and software development environments. Open to opportunities in Python development, cloud technologies, or a combination of both.

Technical Skills:

- **Programming Languages:** Core Java, Python
- **Frameworks:** Flask, Bootstrap
- **Frontend:** HTML, CSS
- **DevOps Tools:** Docker, Azure DevOps(CI/CD)
- **Databases:** MS SQL, PostgreSQL
- **Operating Systems:** Windows, Linux, MacOS
- **Version Control:** GitHub

Professional Experience :

Software Engineer – MetroInfrasys Private Limited, Manesar | August 2023-Present

- Provision and manage Azure compute resources to support the company's infrastructure needs.
- Utilize PostgreSQL to monitor and analyze vehicle data, ensuring accuracy and completeness.
- Developed and maintained PostgreSQL database tables for the Delhi-Mumbai Expressway project.
- Collaborate with cross-functional teams to troubleshoot and resolve application and infrastructure-related incidents.
- Proactively identify and address potential flaws in the application architecture to prevent downtime.
- Developed a **Python-based password manager** for the organization using Tkinter.

Associate Software Engineer – GlobalLogic, Gurugram | December 2022-August 2023

- Provisioned and managed Azure compute resources to support infrastructure requirements.
- Optimized virtual machines for scalability and performance.
- Managed user accounts and security groups to maintain a secure organizational structure.
- Working with **Azure Cloud Services** - Azure Virtual machine, Resource group, AzureActive Directory, Application Gateway, Key vault, etc.
- Extraction of price and availability data from top e-commerce websites using **BeautifulSoup** and **Python**.
- Automated data extraction processes with Python scripts to streamline web scraping tasks.
- Tested and debugged Python scripts before deployment to ensure accurate data extraction and optimal performance.
- Ensured consistent and reliable extraction of dynamic data from e-commerce platforms for real-time pricing and availability monitoring.

Academics:

- **B.Tech in Computer Science & Engineering**, 2022
State Institute of Engineering & Technology (Kurukshetra University),
Nilokheri – 7.77 CGPA
- **Diploma in Mechanical Engineering**, 2019
Guru BrahmaNand ji Government Polytechnic, Nilokheri – 64.07%

Certifications:

- **Microsoft Azure (AZ-104)** Certified

Others :

- **Language:** Hindi, English, Punjabi
- **Certifications:** Microsoft Azure (AZ-104)
- **Other skills:** Leadership, Adaptability, Analytical, Quick Learner.
