Work Experience

Backend Developer

Date Wave | Kerala, India

July 2024 – Present

- Founded and built **Date Wave**, an online blind dating platform enabling users to connect via random chats and voice calls before matching.
 - Designed and implemented backend architecture using **Node.js**, **Express.js**, and **MongoDB** to support real-time communication and secure user authentication.
 - Integrated **Socket.IO** and **WebRTC** to facilitate seamless live chats and voice calls.
 - Deployed and maintained the application on a VPS server using **PM2** for process management and **Nginx** as a reverse proxy.
 - Led a team of interns focused on frontend development using **React** to create a Progressive Web App (PWA) with a mobile-friendly design.
 - Managed the full software development lifecycle, including testing, deployment, and maintenance.
-

Backend Developer

DOTIX | Delhi, India

Jan 2024 – June 2024

- Spearheaded the development of the **Xtraction Project**, an influencer marketing platform, reducing project timelines by 75% and saving significant costs.
 - Built APIs for influencer data retrieval, campaign management, and analytics using **Node.js** and **Express.js**.
 - Integrated **Data365 API** and **Apify Instagram Scraper** to fetch comprehensive influencer data.
 - Automated background tasks using **Node-cron**, improving system efficiency.
 - Implemented advanced features such as CSV parsing, role-based access control (RBAC), and email notifications using **Elastic Email SMTP**.
 - Awarded "**Pinnacle Performer of the Year**" for exceptional contributions to the project.
-

Software Developer

HeadCodes | Kochi, Kerala

Feb 2023 – Dec 2023

- Mentored over 130 students in programming languages like **C** and **Java**, fostering a collaborative learning environment.
 - Supervised interns in the MERN stack, guiding them through real-world projects.
 - Produced educational tutorials on YouTube, focusing on programming fundamentals.
-

Few Projects

Nanolet Framework [View](#)

- Created a lightweight JavaScript framework inspired by **Express.js**, providing middleware functionality and route handling.
- Focused on performance optimization and scalability, ensuring minimal overhead for building APIs.
- Designed with a modular structure to support plug-and-play middleware for different use cases.

Survey Dashboard

- Built a survey management system for businesses with coin-based rewards for participants.
- Tech Stack: **Node.js**, **MySQL**, **Express.js**, **Cloudinary**, **JWT**.

NASA Space Mission Control System [View](#)

- Developed a mission control system integrating Kepler and SpaceX API data.
 - Tech Stack: **Node.js**, **Express.js**, **MongoDB**, **React.js**, **Jest**, **Docker**.
-

Skills

Backend Development: Node.js, Express.js, REST APIs, GraphQL, MVC Architecture, Socket.IO, WebRTC

Frameworks & Tools: Nanolet (custom framework), PM2, Nginx, Docker

Databases: MongoDB, MySQL, Mongoose

DevOps & Tools: GitHub Actions, CI/CD, Postman

Frontend Technologies: React.js, HTML/CSS, Bootstrap, EJS

Authentication & Security: JWT, RBAC, Encryption

Programming Languages: JavaScript, PHP, TypeScript, C, Java, Python

Other Tools: Cloudinary, Elastic Email, Nodemailer, Linux

Achievements

- Awarded "**Pinnacle Performer of the Year**" at DOTIX for exceptional performance and rapid project delivery.
- Successfully launched **Date Wave**, a blind dating app promoting personality-based matchmaking.
- Created the **Nanolet Framework**, a lightweight alternative to Express.js.
- Mentored over 130 students, fostering the next generation of developers.
