Skills

Cloud Computing & Networking:
AWS (EC2, Lambda, S3, VPC, Route 53, VPC Peering, Custom IP Ranges/Subnets).

Containers & Orchestration:
Docker, Kubernetes

CI/CD Tools: Jenkins, AWS CodePipeline, CodeBuild, CodeCommit, CodeDeploy

Scripting & Automation: YAML, Bash, Ansible, Terraform

Version Control: Git, GitHub, Bitbucket

Observability: Prometheus, Grafana

Database: MongoDB

Operating System: Ubuntu
Active Directory Management, Virtualization Technologies

Work History

2023-07 - 2024-03 **DevOps Engineer**
ELPAviation Software, Remote

- Streamlined CI/CD pipeline with Docker, Kubernetes, and version control for seamless deployments.

Education

2018-07 - 2022-07 **Btech: Electronics And Communications Engineering**
G Pullaiah College of Engineering And Technology - Kurnool, AP

Certifications

2024-08 AWS Cloud Practitioner
2024-08 AWS DevOps
2024-07 Fundamentals of Docker

Projects

CI/CD Pipeline for Java Spring Boot Application:

- Built a CI/CD pipeline using Jenkins, Docker, Maven, and SonarQube. Deployed on Minikube with Kubernetes and ArgoCD for continuous deployment.

Production-Grade CSV Server:

- Built and monitored a CSV server with Docker, integrated Prometheus, and resolved production issues through effective troubleshooting.

Automation and Scripting Projects:

- Developed a shell script for real-time AWS monitoring, enhancing performance and efficiency for 10 engineers.

Kubernetes Monitoring with Prometheus and Grafana:

- Deployed Kubernetes monitoring with Prometheus and Grafana, including Helm setup and configuration.

AWS Cloud Cost Optimization - Identifying Stale Resources:

- Automated Cleanup of Unused EBS Snapshots for Cost Optimization Using AWS Lambda

Ansible Automation Projects:

- Automated EC2 setup, instance shutdowns, and S3 versioning for security compliance.

Terraform Infrastructure Management:

- Configured Terraform with S3 and DynamoDB for secure provisioning and state locking.
