

Summary

- Highly motivated and results-oriented Junior Software Engineer with 2+ years of experience in designing, developing, and testing software applications. Proven ability to work independently and as part of a team to deliver high-quality software solutions. Proficient in various programming languages including Java, Python, C++, C#, JavaScript, HTML, and CSS. Seeking a challenging role where I can contribute my skills and grow my career in software engineering.

Skills

Education

Guru Nanak Institute Of Technology

Bachelor of Technology in Technology Information Technology

Hyderabad, Telangana

Jul 2022

Experience

SyMetric

Junior Software Engineer

May 2024 - Nov 2024

Bengaluru

- Assisted in designing database schemas and creating stored procedures.
- Researched, evaluated and implemented new technologies to enhance development process.
- Created unit tests for ensuring quality assurance of developed code.
- Built custom user interfaces using Windows Forms with C# .NET framework technologies.
- Analyzed business requirements and designed appropriate software solutions using C#, ASP .NET, and SQL Server.
- Created web services and web APIs in C# for communication between different systems.
- Designed relational databases in MSSQL Server with Entity Framework ORMs for data access layer of the application.
- Optimized database performance by writing stored procedures using T-SQL queries.
- Maintained version control system repositories like SVN and GIT for tracking changes made over time.

Accelya Solution Private Limited

QA Analyst

Jan 2023 - May 2023

Mumbai

- Developed and maintained test plans, cases, scripts, and data for manual and automated testing.
- Reviewed requirements documents and developed test plans to meet customer objectives.
- Performed functional, integration, system testing, regression testing as well as user acceptance testing.
- Created detailed bug reports with steps to reproduce the issue along with screenshots when necessary.
- Executed tests on various platforms including web-based applications, mobile devices, operating systems, hardware components, and software applications.

- Worked closely with developers to analyze root cause of defects and provide solutions.
- Provided feedback to development teams regarding product performance against expected results.
- Conducted end-to-end black box testing of new products or existing features prior to release cycles.

AB Tech Ville LLP

Dot Net Developer

Hyderabad

Jan2022-Dec2022

- Developed web applications using HTML, CSS, and JavaScript.
 - Created user interfaces for websites with Adobe Photoshop.
 - Implemented automated testing tools to ensure high quality code.
 - Debugged existing application functionality and identified areas of improvement.
 - Resolved customer issues related to software applications and developed solutions to address them.
 - Analyzed requirements and designed database schemas for applications.
 - Provided technical support to customers and other team members on various development projects.
 - Collaborated closely with project managers, designers, and other developers in order to complete tasks efficiently and effectively.
 - Optimized code performance by identifying bottle necks and reducing memory usage.
 - Generated reports from databases using SQL queries.
 - Performed unit tests on all changes made to the codebase.
 - Built responsive web pages that are optimized for different devices.
 - Deployed applications on cloud hosting platforms such as AWS or Azure.
 - Maintained version control repositories using Git or SVN.
 - Integrated third-party libraries into existing software systems.
-
