Profile

RPA Developer with 3+ years of experience in designing and implementing automation solutions for business process using tools like **UiPath**.

Professional Experience

RPA Developer

Eclature Technologies, Hyderabad, India

May-2023 to January-2025

- Developed robotic bots using UiPath to automate manual, repetitive, rule-based, and high-volume processes.
- Defined RPA automation strategy for process involving mainframes, web service calls and web applications.
- Experienced in building the process automation Bots using UiPath RE-Framework.
- Experience in developing RPA bots involving activities like Ui Automation, Excel, Pdf, Email and OCR automations.
- Configured the Bots and deploying processes and scheduled the jobs in UiPath Orchestrator.
- Designed and implemented document understanding workflows using UiPath Document Understanding Framework to process unstructured documents such as invoices, receipts, and purchase orders
- Integrated Chat GPT Vision API with RPA bots for Image Processing
- Integrated API Services (Zoho CRM) with RPA bots for enhancing system interoperability and reducing data redundancy
- Experienced in design and development of Data Extraction Algorithms
- Used Data Scraping method for extracting structured data from browser applications or documents into a CSV file or Excel Spread sheet
- Collaborated with business teams to define taxonomy and validation station workflows for enhanced data accuracy
- Worked closely with Process SMEs to translate process in to Process Definition Document (PDD) & Solution Design Document (SDD) and educated SMEs to work with Bots in production.

Process Associate

Capgemini, Hyderabad, India

December-2021 to April-2023

- Monitoring robot schedules and complete all activities from playbook and complete CRs as per business requirement.
 - Deliver bug free and on time automation solutions
 - Complete Testing and User Acceptance Testing for Automation solutions
 - Provide frequent and relevant updates to all relevant people.
 - Prepare and provide documentation for all automations solution delivered.
 - Review and assess new technologies as they apply to process automation.
 - Adhere to the weekly work schedule to ensure process delivery.
 - Understand business needs and in depth understanding of UiPath processes
- Builds on automation processes and knowledge by applying RPA tools and techniques.*

RPA Tools

UiPath

Technical Skills

Document Understanding	SQL
GIT	VB.NET
Basics of Java	HTML

Certificates

- UiPath RPA Developer Foundation Diploma
- UiPath RPA Advanced Developer

Projects

Project 1: - OpenAI Data Extraction

Summary: Project focuses on automating the extraction of structured and unstructured data from various image formats (e.g., scanned documents, receipts, invoices, forms) using RPA integrated with the **OpenAI API**.

Responsibilities:

- Designed and Developed Data processor bot using **JSON, Excel** and **AWS Database**.
- Integration of **Chat GPT Vision Api** with bots.
- Fine Tuning the Chat GPT Models with Custom Data Extraction Patterns.

Project 2: - Leads Generator

Summary: The Business Leads Generator project aims to streamline the process of collecting and managing potential **business leads** from various online sources.

Responsibilities:

- Integration of **ZOHO's Api** to bot for data storage
- Addition of **Automation Framework** to the project for additional functional capabilities like External Configurations, Reports Generations and Exception Handling.
- Implementing validation rules to ensure that only high-quality leads are captured, including checks for duplicates and completeness of information
- Improved Operational Efficiency by 70% and boosting sale by 20%

Project 3: - Question Bank Conversion

Summary: Question Bank Conversion project to automate the migration and **transformation of exam questions** from multiple formats into a standardized digital repository, significantly enhancing accessibility and streamlining question management.

Responsibilities:

- Integration of **Math OCR Tool** (MathPix) to convert scanned documents, Pdfs and images, them into **LaTeX** Format.
- Designed and developed algorithms to extract data from LaTeX Files to **Excel** and **AWS Database (MySQL)**.
- Achieved a processing speed of extracting 1,500 questions in just 2 minutes per document.

Project 4: - Document processing using DU

This project is to scrape the data from structured or semi-structured documents using the Document Understanding.

Responsibilities:

- Created Taxonomy for multiple documents such as invoices, receipts, and purchase orders
- Utilized UiPath Document Understanding to automate the extraction and validation of key fields
- Integrated machine learning classifiers to handle dynamic templates, improving adaptability to new formats

Project 5: - HR Process Automation (Onboarding, Finance, Exit & Daily Login Reminder)

Summary: Automation of employee onboarding, financial, daily profile update reminder & exit processes and sending task bots status reports to HR Management

Responsibilities:

- Implemented AS-IS & partially headless process automation
- Designed & Developed RPA bots that run HR and Finance team web applications Integrated Outlook
- for daily e-mail reminders

Project6: - DocValdiation

Summary: Process of validating custom tool generated documents structure regarding **template document**.

Responsibilities:

- Worked closely with business users in identifying and defining the requirements and analysing them.
- Designed and Developed validation process bots.
- Ensured reusable components are designed and developed where applicable. Preparing the
- design document about the automation process

Project 7: - Calls Summary Report Generator

Summary: Project focuses on automating the process of generating detailed **call summary reports** from the Knowlarity cloud communication platform.

Responsibilities:

- Desing and development of Report Time period picking process that works based on the current run of the bot
- Developed bot for knowlarity website Log-in and Log-out Process
- Developed a process to generate different types of reports, such as individual agent performance reports, call centre efficiency reports, missed call reports, and detailed customer interaction logs from the downloaded CSV call records.

Education

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Swami Ramananda Tirtha Institute of Science and Technology, Nalgonda.
