

SUMMARY

Experienced Software Engineer with a strong background in Python, C++, and C programming. Proficient in software development, design, and data pipeline creation. Skilled in working with agile methodologies and capable of thriving in fast-paced environments. Possess excellent interpersonal and communication skills along with a quick learning ability.

PROFESSIONAL EXPERIENCE

Sr Software Engineer

May '24 - Oct '24

Sunovaa Tech

Bangalore

Project: nFMS by Honeywell

- Worked on the Trace analysis
- understanding of Data Link
- Worked on the implementation of Input Output Interface using Cpp and ADA
- Worked on Input Output LRU Implementation
- worked on testing the input output interfaces and LRU using DTFSpy

Software Engineer

Jan '21 - Feb '24

Capgemini India

Bangalore

Project: Bluetooth by Intel India.

- Worked on Firmware code cleanup activities.
- Worked on Exception Analysis and debugging of the issues.
- Worked on improvement JIRAs, where we have added some logging to improve the debugging possibilities
- Learnt about the basic concepts of the BT BR/EDR and LE. 5.Knowledge on basic test code frame work.

Project: GNSS by Intel India.

- core dump analysis and Modification of the code using Python
- Implementation of automation testing to increase code coverage, reducing the number of production issues
- worked on INF manufacturer OS check for Particular driver versions
- Release Automation using python and conditional check for each driver version.
- code error analysis , Modem Log collection , Testing and Debugging

Project : SIL Replay Automation by Mercedes-Benz

Main Feature : Camera

- Created Python wrappers for existing C++ business modules.
- Implemented threading to achieve concurrent execution of tasks.
- Optimized performance and resource utilization through concurrent processing
- Utilized OpenCV (cv2) library for video processing tasks.
- Executing ML model that Process image frames and overlaying its prediction on video
- Developed Flask services for hosting and serving exported videos.
- Ensured accessibility of hosted videos across the network with a user-friendly interface.
- Tracked system performance, identified issues, and facilitated debugging and optimization.
- Maintained comprehensive documentation for the entire project.
- Included code documentation, system architecture, and usage instructions.
- Ensured scalability and maintainability for future enhancements or updates.

Project : HIL Replay By Mercedes-Benz

- NI based Hardware Connections
- Regression Testing
- Trace Generation Automation using python For single and multiple CIVIC's
- Acceptance Testing For Accuracy check for HIL
- Trace Analyzer for All SNA Detection

KEY SKILLS

C++ Programming
C Programming
Python
Robot Framework
Linux
Agile Methodology
knowledge on Docker

TOOLS

- GIT
- Confluence
- Jenkins
- JIRA
- Arti factory
- SQLite DB
- DTFSpy
- Trace Tool

INTERNSHIPS

Intern	Jan '18 - Jan '18
Electronics Corporation of India Limited (ECIL)	
Worked on: Embedded systems	

PROJECTS

- Sign to speech conversion using mobile for dumb and deaf people.
- Department of ECE, Godutai Engineering College for Women,
Hardware requirements- Flex sensor, Buffer unit, Comparator, ATMEGA16Microcontroller, LCD, Bluetooth module
- Blind stick with audio interface
- Electronics Corporation of India Limited (ECIL)
Hardware requirements- 8052 microcontroller, power supply, ultrasonic sensor, LED, APR9301, Speaker

EDUCATION

B.E(Electronics and communication)	Jan '15 - Jan '19
Godutai Engineering College For Women	kalaburagi, Karnataka, India
PUC	Jan '13 - Jan '15
Sharnbasveshwar composite pre-university college	kalaburagi, Karnataka, India
SSLC	Jan '12 - Jan '13
Sharnbasveshwar Residential Public School	kalaburagi, Karnataka, India

CERTIFICATION

certification On Embedded Systems	Jan '19 - Jan '20
Vector India	Banglore , karnataka , india
