Hard Skill

- Database : SQL
- Programming Language : JAVA
- Web Development : React, Node.js
- App Development : Android(Java)
- Operating System : Linux , Windows
- Tools : Visual Studio, Spring Tool Suite
- Problem Solving , Troubleshooting

Education Background

- PG Diploma: Diploma in Mobile Computing
Sunbeam-Pune
C-DAC
2024
- JSPM Imperial College of Engineering
and Research Pune
Bachelor of Engineering
Electronics and Telecommunication
2023
- KK Wagh Polytechnic Nashik
Diploma
2020
- St Aloysius High School Bhusawal
SSC
2016

About Me

An enthusiastic fresher with highly motivated and leadership skills having bachelor's of engineering degree. Expert in implementation of each step of project. Eager to learn new technologies and methodologies. Always willing to innovate the new things which can improve the existing technology.

Academic Projects

Title :- Online Job Portal System

Duration : 6 Months

Platform : MySQL, Node.js, React, Android

<https://github.com/8386-PGDMC/Online-Job-Portal-System.git>

- Online Job Portal System is an application which connects employers and job seekers, where employers are the source of the resources and the job seeker can find and apply for their targeted job.
- In this project we use Node.js and MySQL to handle server side logic, database interactions, API development
- at client side we use React and Android. It serves as a platform to bridge the gap between job seekers and employers, offering features for efficient job search, application submission, and recruitment.

Title :- Smart Car Parking System using NodeMCU

Duration : 9 Months

Platform : Arduino IDE

- Nowadays finding parking in busy areas is very hard this problem can be solved by the IoT based smart parking system.
- Here we have builded a IoT based Car Parking System using NodeMCU, five IR sensors, and two servo motors.
