SUMMARY

Backend Developer with of experience in building scalable RESTful APIs with Spring Boot and Microservices. Proficient in designing and maintaining robust backend systems. Seeking a role to leverage my Java expertise and drive innovative, high-performance solutions.

SKILLS

Technical Skills	Java, Spring Boot, Microservices, RESTful APIs, JavaScript , SQL, Git, GitHub
Other	SDLC, JIRA, IDEs, Agile Methodology, Data Structures and Algorithms

EXPERIENCE

Consultant 1	Sept 2023 - Current
Enkaytech Consultants	Bangalore, India

- Built Restful API using Java, Spring Boot, and JPA for an employee work management system (SaaS product), improving data access efficiency.
- Developed microservices to handle key tasks, ensuring communication between different parts of the system.
- Worked on database design and management, optimizing data flow and storage for internal applications.

Developer intern	April 2023 - Sep 2023
Palle Technologies.	Bangalore, India

- Collaborated with Developers on developing applications using Java, Spring Boot, and front-end technologies.
- Contributed to projects with proactive problem-solving and a commitment to high-quality work.

PROJECTS

Movie API- Movie Booking system . Developed a movie booking system using Java, Spring Boot, Spring Security (for login and registration), and MySQL, allowing users to browse, book, and manage movie tickets efficiently.

EMS-Employee-Management. Designed and implemented a system using Spring Boot, Spring Data JPA, and MySQL, supporting CRUD operations and search functionality via Restful API with an MVC architecture.
