EDUCATION

- S I T Govt. Engineering College Pithoragarh (B.tech)
- APS SCHOOL (Intermediate)
- Beersheba Senior Secondary School (High School)

TECHNICAL SKILLS:

RPA Tools: UiPath(Studio,Orchestrator,REFrameWork,Document Understanding,Test Suite,Automation Hub) and AUTOMATION ANYWHERE(A11,A19,IQ bot)

Source Control Tools: GitHub, Bitbucket

Methodology: Agile, Waterfall.

Languages/ Programming: C, C++, C#, SQL, VB.NET, VBA, Python.

Other Technologies: Microsoft office 365, CyberArk, MFT Server, Flex Deploy

Databases: MYSQL, SQL Server, Oracle DB.

Operating Systems: Windows.

PROJECTS

Air Canada

(01-06-2024– 25-09-2024)

Scheduling Assistant Trax

Technologies: UiPath Test Suite, Trax (Java based application), Api

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Created Test Plan and Test Cases document for SA trax.in Jira.
- Delivered the 100+ automated test cases using UiPath Test Suite.
- Jira (Test cases upload, Test execution creation, Dashboard creation, Defect creation and management)

Description:

The Process creates the work order in Trax application for the air craft maintenance using the Scheduling Assistant API.

HNI

(20-03-2023 – 31-03-2024)

Manual Invoice Delivery

Technologies: UiPath, Edge, Microsoft office 365 Server, Oracle DB.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process creates and download the customer invoices based on the transactions fetch by Oracle Db in Oracle EBS application. And sends the download invoices to the customer after processing.

Sequencing of Resources and Processing

Technologies: UiPath, Edge, Microsoft office 365 Server, Oracle DB.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process performs the sequencing of resources using the sequencing resources file in Oracle EBS application and checks the status of sequencing and send the final report.

QATAR AIRWAYS

(30-10-2022 – 15-02-2023)

UCB

Technologies: UiPath, Edge, Outlook, Oracle DB.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process perform a clean-up activity of the inventory held by the agents for more than 30 mins without ending the transaction and creating the PNR. Send a detailed weekly report to business.

Finance Customer Creation and Supplier Creation

Technologies: UiPath, Edge, Outlook, Oracle DB.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process creates Customer and Supplier in Qworkflow and Esourcing application and also perform bank mapping process.

Ticket ReValidation

Technologies: UiPath, Edge, Outlook, Excel.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process perform the revalidation of the PNR received by the contact center team in the ARD WEB application and provides the output with status of each PNR.

SAUDI NATIONAL BANK(SNB)

(01-03-2022 - 30-10-2022)

FIU INVESTIGATION

Technologies: UiPath, Edge, Outlook, Excel, UiPath Action Center.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process perform a complete check on the customer for fraud transactions and prepare indication of suspicion report for ALM and FIU portal.

SAMA INVESTIGATION

Technologies: UiPath, Edge, Outlook, Excel, UiPath Action Center.

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User and Hyper care.

Description:

The Process perform the complete credit and risk investigation of individual or corporate for SAMA Bank and creates final report and screenshot pdf and upload into SSU internal portal.

Test Automation

Technologies: UiPath, Edge, Outlook, Excel, UiPath Test Suite.

Description:

The Project involves the creation Automation test cases for the 7 applications namely- NBL, SIBEL, CORTEX, COGNOS, for new updates. Created 200+ test cases as per requirement.

PWC Finance Projects

SNOW BOT

Technologies: UiPath, ServiceNow, Python

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User.

Description:

This process automates service now tool for three main category tickets (Incident, Expense and non-expense). It decides the assignment of the ticket basis on the description provided by the user to the concern team member.

TREASURY BOT

Technologies: UiPath , Excel

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User.

Description:

This process creates the journal Entry file for MJE bot. Using Bank statement and Bank master File.

CLIENT BILLING

Technologies: UiPath, SQL SERVER, Chrome

Responsibilities:

- Actively involved in requirement analysis, project design and project planning.
- Gathered business rules and requirements and converted it to code and automation.
- Documented training materials and user manual for the current solution. Communication with Management and BA to keep them updated on progress.
- Responsible for the regular production support activities as well as the maintenance related tasks. Analysis of Business and Technical Requirements.
- Conducting UAT testing with End User.

Description:

User enters a billing request in Cognition portal. Bot takes the billing request of the user from the Cognition Database. And validates the request from the ERP and creates bill.
