JOB OBJECTIVE

Accumulated a wealth of experience of over 5 years in the realms of both Manual and Automation Testing, contributing to quality assurance in various technology-driven projects. Aspiring to apply a deep understanding of quality assurance principles and diverse software testing methodologies to drive excellence in challenging roles within the technology sector.

CORE COMPETENCIES

- Automation Testing
- Manual Test Case Design & Execution
- Bug Tracking & Reporting
- Test Scenario & Test Case Review
- Sprint-based Test Execution
- Defect Lifecycle Management
- Agile & Scrum Methodologies
- Test Reporting & Documentation
- Cross-functional Collaboration

TECHNICAL SKILLS

- Programming Language: Java
- Testing Tool: Selenium & WebDriver
- Framework: TestNG
- Excel Read: POI
- Design Pattern: POM with Page Factory
- Project Management Tool: Jira
- Version Control: Git
- IDE: Eclipse
- CI/CD Tool: Jenkins
- Build Tool: Maven

EDUCATION

2015: B.Tech. in Computer Science and Engineering from LBSITW

CERTIFICATIONS

- ISTQB Foundation
- TOSCA Certifications [Tricentis]
- SCRUM Foundation Professional Certificate [CertiProf]

PROFILE SUMMARY

- Possess over 5 years of comprehensive experience in both Manual and Automation Testing, specializing in driving quality assurance processes across diverse technology projects, ensuring high standards and seamless product performance.
- Proven expertise in creating and executing robust test cases for both manual and automated testing environments. Skilled in utilizing industry-leading tools such as Selenium, TestNG, and Java to optimize testing workflow and enhance efficiency.
- Proficient in working within Agile frameworks, with extensive experience in sprint-based testing, test case management, and defect lifecycle tracking using Jira, ensuring timely delivery of quality results in fast-paced development cycles.
- Expertise in defect identification, documentation, and tracking throughout the software development lifecycle. Proficient in logging issues, collaborating with cross-functional teams, and ensuring the effective resolution of bugs to meet project goals.
- Experienced in applying industry best practices such as the Page Object Model (POM) design pattern to build scalable, reusable test frameworks. Skilled in integrating tools like Jenkins, Maven, and Git for CI/CD pipelines, ensuring high-quality deliverables.

COURSE

Automation along with Java | Obscura Zone | Jun'24 – Aug'24

Project: 7rmartSuperMarket

Highlights:

- Identified and defined test scenarios for both manual and automated testing.
- Designed and executed manual test cases to verify functionality and performance.
- Analyzed and selected test scenarios suitable for automation, and developed corresponding automation scripts using Selenium and Java.
- Applied Page Object Model (POM) design pattern to ensure reusable & maintainable test code.
- Participated in reviewing test scenarios and defect reports to ensure comprehensive test coverage and accurate defect tracking.
- Performed functionality testing for various modules to ensure these met specified requirements.
- Generated test reports using TestNG to summarize testing activities and outcomes.
- Logged & tracked bugs, collaborating with the development team to ensure timely resolution.

WORK EXPERIENCE

QuEST Global Engineering Services, Trivandrum | Senior Software Engineer | Dec'21 – Jun'23

Project: Dollar Tree | Sep'22 – Jun'23

Key Result Areas:

- Warehouse Testing:** Contributed to testing efforts for the Dollar Tree project, focusing on warehouse-related functionalities.
- Module Analysis:** Analyzed & understood assigned module based on SFS (System Functional Specification) and TG (Test Guidelines) documents to ensure accurate test case creation.
- Jira Ticket Management:** Created Jira tickets for the assigned modules, ensuring proper documentation and tracking of issues and tasks throughout the testing lifecycle.
- Test Case Development:** Wrote detailed test cases (TCs) based on the understanding of the module and the "happy path" defined in the TG documents, ensuring comprehensive coverage.
- Peer/QA Lead Review:** Ensured the quality of test cases by having them reviewed by peers and QA leads, adhering to team standards.
- Test Case Upload:** Uploaded reviewed test cases to TestRail for organized test case management and easy access by the testing team.
- Automation Script Development:** Developed automation scripts within the Matflow Development folder, collaborating with the team for reviews before final approval.
- Script Review & Finalization:** Worked with QA lead/peer to review automation scripts, ensuring they met the project requirements before pushing to the main folder for stakeholder access.
- Jira Status Updates:** Managed Jira ticket status throughout the testing process, updating the status at each stage to reflect progress and issues.
- Sprint Review Meetings:** Participated in weekly client sprint review calls to discuss updates, progress, and any challenges encountered during testing.

Project: DS Agile | Dec'21 - Jun'22

Key Result Areas:

- **Subsystem Testing:** Collaborated with different subsystems in the power domain, such as OI, SMT, SCE, and AM, to ensure each component worked as expected.
- **Test Case Execution & Validation:** Conducted test case execution and validation during each sprint to ensure the software met quality standards.
- **Defect Reporting & Collaboration:** Worked closely with the QA Lead to identify, discuss, and report bugs in Jira for timely resolution.
- **Bug Fix Verification:** Verified bug fixes by manually testing the changes and coordinating with developers to confirm successful resolution.
- **Test Case Creation for Bug Fixes:** Developed new test cases for validating bug fixes and collaborated with the QA Lead to ensure the test cases met quality standards before execution.

Allianz Technology SE, Trivandrum | Analyst | Apr'20- Dec'21

Project: Desktop Application Testing for AVC | Jun'20 – Dec'21

Key Result Areas:

- **Functional Testing:** Performed comprehensive functional testing of all applications within end-user virtual machines, ensuring each application met the required specifications.
- **Manual Test Case Execution:** Managed and executed over 200 manual test cases for each virtual machine, following a scheduled testing flow to ensure complete coverage.
- **Automation Testing:** Contributed to the automation testing efforts, streamlining testing processes to enhance efficiency and repeatability.
- **Client Collaboration:** Worked closely with European clients to understand their specific requirements and ensure the software met their needs.
- **Test Reporting & Documentation:** Documented test results and reported issues, ensuring clear communication with development teams to address any defects or discrepancies.

KBS Technologies, Trivandrum | QA Engineer | Jun'18 – Apr'20

Project: Human Resource Management System Site | Oct'18 – Sep'19

Key Result Areas:

- **Test Case Development & Execution:** Created and updated manual and automation test cases to ensure the functionality of the HRMS website, which serves as an intermediary between candidates and companies.
- **Automation Testing:** Conducted automation testing using Selenium with Java to streamline test execution and improve efficiency.
- **Feature Validation:** Validated features including candidate registration, data updates, resume uploads, and profile shortlisting by companies to ensure smooth functionality.
- **Interview Scheduling Validation:** Tested the functionality of interview scheduling, ensuring the system met the requirements for both candidates and interviewers.
- **Test Reporting:** Documented and reported test results, ensuring that any issues identified during testing were communicated effectively to the development team for resolution.

Project: Xcellencer Website | Jun'18 – Sep'18

Key Result Areas:

- **Manual Testing:** Performed manual testing on the KBS Technologies official website, focusing on validating new functionalities implemented during updates.
- **Bug Reporting & Documentation:** Prepared detailed bug reports and communicated issues to the development team, ensuring clear documentation in Excel sheets (Google Docs).
- **Defect Tracking:** Managed and tracked defects throughout the testing phase, providing regular updates to the development team for resolution.
