

Amruth Srinivas

Gen AI Developer

✉ srinivasamruth17@gmail.com ☎ 7338683468 📍 Bangalore 🔗 <https://www.linkedin.com/in/amruth-srinivas>

PROFESSIONAL EXPERIENCE

Infosys Ltd

May 2022 – present | Bangalore

- Prototyped and delivered Gen AI-powered solutions using RAG technique
- Development of Gen AI applications for various use cases using LLMs
- Converted data into actionable insights with Power BI for data analysis and insights

SKILLS

Gen AI — Langchain, Crew AI, RAG, Prompt Engg, Vector Databases, Advance RAG, LLMs, **ML & DL** — Machine Learning Algorithms, Neural Networks, Transformers, NLP, **Data Science** — Numpy, Pandas, Data Pre-Processing, Power BI, **Languages/Frameworks** — Python, Langchain, Flask, Streamlit, SQL

PROJECTS

Advanced RAG Project

- Implemented Advanced RAG technique to improve the model response and reduce LLMs hallucination.
- Worked on Reranking, context compression, Hybrid Retriever, query transformation to retrieve better responses.
- Implemented RAGAS framework to evaluate the RAG pipeline for retriever and generator **87 to 95**.

Ticket fetch and Resolution using Crew AI and Semantic Search

- Implemented Crew AI's Agents and Tools Framework to fetch different types of tickets from SQL database by taking input from the user in natural language
- Implemented database query functionality within the app to retrieve and manipulate data efficiently.
- Implemented Semantic Search to provide resolution to the tickets based on the closed tickets resolution as knowledge base

Outlook Chain Analyser

- Developed an automated Outlook email analyzer to extract key participants, deadlines, client data from SME and consultant communications.
- Stored the extracted data in S3 in a dynamic manner, enabling efficient tracking of client engagements and project outcomes

Built GenAI use cases POC for internal and external clients

- Leveraged Bedrock and Azure OpenAI LLMs to build GenAI use cases like outlook chain analyzer, Invoice Extractor, Summary Generator, Chatbots
- Deployed and hosted in internal Infosys Applied AI platform

Document Question Answering

Document QnA using RAG techniques for Annual Reports

- Developed and implemented RAG techniques using LLMs for document question answering, resulting in a 30% increase in accuracy.
- Analyzed annual reports data and generated insights to improve the question answering model, leading to a 20% reduction in response time.
- Built the RAG pipeline for various user input formats (PDF, docx, ppt, word, audio).

Power BI reports for Banking Sector

- Gathered requirements from clients and analyzed those requirements and provide estimates.
- Collaborated with ETL team to load data in Oracle
- Created different visualisations like line, bar, Pie, Tree maps, cards and tables.
- Developed Power BI reports & Effective dashboards after gathering and translating end user requirement.

EDUCATION

MSRIT, B.E - Mechanical

2017 – 2021 | Bangalore

SDMRC, Pre University

2015 – 2017 | Ujire
