PROFILE

Recent graduate with a solid foundation in data analysis, seeking opportunities to apply my skills in a data-driven role and contribute to business insights and decision-making.

EDUCATION

MSc Computer Science Sep 2021 – Sep 2023 | Mumbai
Somaiya VidyaVihar University
CGPA: 9.50 / 10

BSc Mathematics Aug 2018 – Aug 2021 | Mumbai
University Of Mumbai
CGPA: 6.40/10

PROFESSIONAL EXPERIENCE

Associate System Engineer Intern Mar 2023 – May 2023 | Mumbai
In-Tap Technologies Pvt.Ltd

- Configured and managed **Azure services** including virtual machines, storage accounts, and networking components.
- Deployed **20+ Azure VMs** and storage accounts, reducing downtime by **80%** and deployment time by **50%**.
- Improved **VM performance by 20%**, optimizing for specific application needs.
- Managed **3 site-to-site VPN tunnels** and configured **2 domain controllers** for secure, reliable connectivity and enhanced access control.

SKILLS

Data Analytics & Visualization: — Power BI, Tableau, MS Excel (Pivot Tables, Charts, Dashboards)

Programming & Databases: — SQL, MySQL, Python

Business Intelligence: — Power Query, DAX

Version Control & Collaboration: — GitHub

PROJECTS

Crimes Against Women in India Analysis

- Analyzed crimes against women in India using **Python** for data cleaning, aggregation, and visualization.
- Used **Pandas, Matplotlib, and Seaborn** to preprocess data and create visual insights.
- Explored crime data by **region, year, and offense type** to identify key patterns.
- Created visualizations to highlight trends and regional variations in crime rates.

Revenue Growth from Excel Analysis of 1,000+ Customers at Vrinda Store

- Analyzed data of **1,000+ customers** in Excel using **pivot tables and charts** to extract key insights.
- Cleaned data by removing **20 duplicates** and addressing **50 missing values** to ensure accuracy.
- Developed a targeted marketing strategy for **women aged 30-49**, covering **65% of the customer base** in Maharashtra, Karnataka, and Uttar Pradesh.
- Increased revenue by **30%** through **targeted ads** and promotions on **Amazon, Flipkart, and Myntra**.

SQL Data Analysis of Pizza Hut Sales

- Analyzed **43,650 order details**, working with **25,480 records** from the orders table.
- Used **SQL JOIN** to combine data from **4 tables**, creating a comprehensive dataset for analysis.
- Applied **GROUP BY** and **ORDER BY** to identify sales trends and highlight the top 3 sales transactions.
- Provided actionable insights to improve **sales forecasting accuracy** and support data-driven decisions.

Sales Performance Dashboard

- Created an interactive **Power BI dashboard** to track sales, top products, and regional performance.
- Used **DAX** for key calculations like total sales and average sales by region.
- Designed **bar charts, line graphs, and pie charts** for clear data visualization.
- Added filters for date, product, and region to identify trends and patterns easily.

CERTIFICATES

Microsoft PowerBI Data Analyst (Coursera) | Data Analytics -Anudip Foundation
